AMERICAN NATIONAL STANDARD

American National Standard

Approval of an American National Standard requires verification by the American National Standards Institute (ANSI) that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

ANSI does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the ANSI. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

NOTE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing ANSI.

FOREWORD (This foreword is not part of American National Standard Z245.1-2012)

This revised American National Standard (ANS) applies to the construction, reconstruction, modification, care, maintenance, operation, and use of mobile waste or recyclable materials collecting, transportation and compacting equipment. The standard identifies requirements for refuse collecting and compacting equipment mounted on refuse truck chassis: rear-loading, front-loading, and side-loading compacting equipment; roll-off and hoist-type equipment; grapple vehicles; satellite vehicles; waste transfer trailers; recycling collection vehicles; and mobile equipment with container and cart lifting equipment.

The standard does not apply to the truck chassis/cab upon which the waste or recyclable materials collecting and compacting equipment is mounted except for certain provisions as stated in Section 10.1.1 and Section 12.

This standard revises ANSI Z245.1-2008. Provisions of ANSI Z245.1-2008 remain in effect and are immediately applicable to all new mobile collecting and compacting equipment.

Effective dates for ANSI Z245.1-2012:

24 months after the approval date of this standard for all new mobile collecting and mobile compacting equipment.

Sections 4.5, 4.6, 5.1.2, and Sections 6, 7 and 13 shall apply for all existing mobile equipment 24 months after the approval date of this standard regardless of the date of manufacture.

Requests for interpretation and suggestions for improvement of this American National Standard are invited. They should be sent to the Secretary, ASC Z245, c/o Environmental Industry Associations, 4301 Connecticut Ave., NW, Suite 300, Washington, DC 20008.
This revised American National Standard was processed and approved for submittal to ANSI by the Accredited Standards Committee on Equipment Technology and Operations for Wastes and Recyclable Materials, Z245. Committee approval of this standard does not necessarily imply that all committee members voted for its approval. At the time it approved this revised standard, the Z245 Committee had the following members:

Susan Eppes, Chairman
Jerald Zanzig, Vicechair
Janice Comer Bradley, Secretary

The members of Accredited Standards Committee Z245, and the organizations represented, who participated in the development of this standard were:

Karon Simoni (Alternate) City of Rochester
Daniel L. Lapato Commonwealth of Pennsylvania DEP
Ed Correale PTR Baler and Compactor Company
Steve David Nu-Life Environmental, Inc.
Paul Moore NIOSH
Ralph A. Ford Waste Industries
Michael L. Knaub Schaefer Systems International, Inc.
Jerald G. Zanzig Zantec, Inc.
Denny Gill Ameri-Kan
Thomas Stevens Wolverine Recycling Services, Inc.
Denny Pool SP Industries, Inc.
Steven M. Wienkes Environmental Equipment Solutions
David E. Malter Malter Associates, Inc.
W.A. Martin Waste Management, Inc.

American National Standard for Equipment Technology and Operations for Wastes and Recyclable Materials —

Mobile Wastes and Recyclable Materials Collection, Transportation, and Compaction Equipment —
Safety Requirements

0 Introduction

This standard was developed by American National Standards Institute Accredited Standards Committee Z245 Subcommittee 1 on Mobile Collection Equipment and approved by Accredited Standards Committee Z245.

This standard revises the collection, transportation and compaction equipment safety requirements found in ANSI Z245.1-2008 by providing specific requirements for construction, maintenance and operation necessary to ensure the safe manufacture and operation of the mobile equipment.

The requirements contained in this standard pertain to new mobile collection equipment as produced by the manufacturer. New requirements and revisions are not intended to be retroactive for waste collection vehicles manufactured to comply with earlier revisions of this standard.

1 Scope

1.1 This American National Standard is applicable to all persons engaged in the manufacture, reconstruction, modification, operation, cleaning, maintenance, service, or repair of mobile collecting, transporting, and compacting equipment.

Exception: This standard does not address equipment used for the collection, transportation, or disposal of hazardous or flammable materials regulated by Title 40 Code of Federal Regulations (CFR) Part 263 or 49 CFR Parts 171 through 180.

1.2 Sections 8 to 12 provide equipment safeguards and features and dual drive configuration requirements that shall apply to:

a) mobile rear-loading, side-loading, front-loading, and mechanized container collecting equipment used to receive, compact, transport, and unload waste or recyclable materials;

b) mobile tilt-frame and hoist-type equipment commonly used to pick up, transport, unload, and set down open top or enclosed waste or recyclable materials containers;

c) vehicles used to receive, separate, densify, transport, and unload recyclable wastes;

d) grapple loaders that pick up, load and transport bulky uncontainerized special waste like wood waste or white goods;

e) trailers used to transfer waste from one waste processing or disposal facility to another;
