ANSI/ESD S13.1-2019

For the Protection of Electrostatic Discharge Susceptible Items

Electrical Soldering/Desoldering Hand Tools

Electrostatic Discharge Association
7900 Turin Road, Bldg. 3
Rome, NY 13440

An American National Standard
Approved January 14, 2020
ESD Association Standard for the Protection of Electrostatic Discharge Susceptible Items -

Electrical Soldering/Desoldering Hand Tools

Approved September 23, 2019
EOS/ESD Association, Inc.
Electrostatic Discharge Association (ESDA) standards and publications are designed to serve the public interest by eliminating misunderstandings between manufacturers and purchasers, facilitating the interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining the proper product for his particular needs. The existence of such standards and publications shall not in any respect preclude any member or non-member of the Association from manufacturing or selling products not conforming to such standards and publications. Nor shall the fact that a standard or publication that is published by the Association preclude its voluntary use by non-members of the Association whether the document is to be used either domestically or internationally. Recommended standards and publications are adopted by the ESDA in accordance with the ANSI Patent policy.

Interpretation of ESDA Standards: The interpretation of standards in-so-far as it may relate to a specific product or manufacturer is a proper matter for the individual company concerned and cannot be undertaken by any person acting for the ESDA. The ESDA Standards Chairman may make comments limited to an explanation or clarification of the technical language or provisions in a standard, but not related to its application to specific products and manufacturers. No other person is authorized to comment on behalf of the ESDA on any ESDA Standard.

THE CONTENTS OF ESDA'S STANDARDS AND PUBLICATIONS ARE PROVIDED "AS-IS," AND ESDA MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, OF ANY KIND WITH RESPECT TO SUCH CONTENTS. ESDA DISCLAIMS ALL REPRESENTATIONS AND WARRANTIES, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR USE, TITLE, AND NON-INFRINGEMENT.

ESDA STANDARDS AND PUBLICATIONS ARE CONSIDERED TECHNICALLY SOUND AT THE TIME THEY ARE APPROVED FOR PUBLICATION. THEY ARE NOT A SUBSTITUTE FOR A PRODUCT SELLER'S OR USER'S OWN JUDGEMENT WITH RESPECT TO ANY PARTICULAR PRODUCT DISCUSSED, AND ESDA DOES NOT UNDERTAKE TO GUARANTEE THE PERFORMANCE OF ANY INDIVIDUAL MANUFACTURER'S PRODUCTS BY VIRTUE OF SUCH STANDARDS OR PUBLICATIONS. THUS, ESDA EXPRESSLY DISCLAIMS ANY RESPONSIBILITY FOR DAMAGES ARISING FROM THE USE, APPLICATION, OR RELIANCE BY OTHERS ON THE INFORMATION CONTAINED IN THESE STANDARDS OR PUBLICATIONS.

NEITHER ESDA, NOR ITS PRESENT OR FORMER MEMBERS, OFFICERS, EMPLOYEES OR OTHER REPRESENTATIVES WILL BE LIABLE FOR DAMAGES ARISING OUT OF, OR IN CONNECTION WITH, THE USE OR MISUSE OF ESDA STANDARDS OR PUBLICATIONS, EVEN IF ADVISED OF THE POSSIBILITY THEREOF. THIS IS A COMPREHENSIVE LIMITATION OF LIABILITY THAT APPLIES TO ALL DAMAGES OF ANY KIND, INCLUDING WITHOUT LIMITATION, LOSS OF DATA, INCOME OR PROFIT, LOSS OF OR DAMAGE TO PROPERTY AND CLAIMS OF THIRD PARTIES.

FOREWORD

Electrical overstress (EOS), and electrostatic discharge (ESD) can damage or degrade certain electronic components and assemblies. The intent of this standard is to provide test requirements for soldering/desoldering hand tools used in ESD Safe work areas or on materials that are deemed to be ESD sensitive. The methods described herein can be used during procurement, qualification, and verification of soldering/desoldering hand tools to verify that electrical integrity has not been compromised that could result in EOS/ESD damage. There has been no attempt to define how the soldering irons are to be used.

This standard was originally approved on May 21, 2000, and was designated ESD STM13.1-2000. ANSI/ESD S13.1-2015 is a revision and redesignation of ESD STM13.1-2000 and was approved on June 23, 2015. ANSI/ESD S13.1-2019 is a reaffirmation of ANSI/ESD S13.1-2015 and was approved on September 23, 2019.

ESD Association Standard (S): A precise statement of a set of requirements to be satisfied by a material, product, system or process that also specifies the procedures for determining whether each of the requirements is satisfied.
The following individuals contributed significantly to the development of ANSI/ESD S13.1-2015 and/or ESD STM13.1-2000:

1.0 PURPOSE AND SCOPE

1.1 Purpose
This standard provides electrical soldering/desoldering hand tool test methods for measuring current leakage, tip to ground reference point resistance, and tip voltage.

1.2 Scope
This standard establishes test procedures to (1) qualify, (2) perform testing of, and (3) test repaired three-wire AC, soldering/desoldering hand tools.

2.0 REFERENCES
Unless otherwise specified, the following documents of the latest issue, revision or amendment form a part of this standard to the extent specified herein:
ESD ADV 1.0, ESD Association’s Glossary of Terms
ANSI/ESD S6.1, Grounding
ESD TR53, Compliance Verification of ESD Protective Equipment and Materials

3.0 DEFINITIONS
The terms used in the body of this document are in accordance with the definitions found in ESD ADV 1.0, ESD Association’s Glossary of Terms available for complimentary download at www.esda.org.

4.0 PERSONNEL SAFETY
THE PROCEDURES AND EQUIPMENT DESCRIBED IN THIS DOCUMENT MAY EXPOSE PERSONNEL TO HAZARDOUS ELECTRICAL CONDITIONS. USERS OF THIS DOCUMENT ARE RESPONSIBLE FOR SELECTING EQUIPMENT THAT COMPLIES WITH APPLICABLE LAWS, REGULATORY CODES, AND BOTH EXTERNAL AND INTERNAL POLICY. USERS ARE CAUTIONED THAT THIS DOCUMENT CANNOT REPLACE OR SUPERSEDE ANY REQUIREMENTS FOR PERSONNEL SAFETY.
GROUND FAULT CIRCUIT INTERRUPTERS (GFCI) AND OTHER SAFETY PROTECTION SHOULD BE CONSIDERED WHEREVER PERSONNEL MIGHT COME INTO CONTACT WITH ELECTRICAL SOURCES.
ELECTRICAL HAZARD REDUCTION PRACTICES SHOULD BE EXERCISED, AND PROPER GROUNDING INSTRUCTIONS FOR EQUIPMENT SHALL BE FOLLOWED.
THE RESISTANCE MEASUREMENTS OBTAINED THROUGH THE USE OF THIS TEST METHOD SHALL NOT BE USED TO DETERMINE THE RELATIVE SAFETY OF PERSONNEL EXPOSED TO HIGH AC OR DC VOLTAGES.

5.0 TEST METHODS
This standard describes the resistance measurement of the tip-to-ground reference point, the tip voltage measurement, and the measurement of current leakage from the tip of the electrical soldering/desoldering hand tools to the grounding conductor of the power cord. EOS/ESD safe soldering parameters for these measurements are specified.
