Shower and Tub/Shower Enclosures and Shower Panels

1 Scope

- 1.1** This Standard covers shower panels, enclosures for showers and tub/shower combinations, and floor-mounted showers intended for new and retrofit applications and specifies requirements for materials, physical characteristics, performance testing, and markings.
Note: *In this Standard, “enclosures for showers and tub/shower combinations” are referred to as “enclosures”.*
- 1.2** Shower panels and enclosures covered by this Standard can include
- (a) factory-installed supply and waste fittings;
 - (b) factory-formed or factory-plumbed shower thresholds; and
 - (c) factory-plumbed shower doors.
- 1.3** The requirements of this Standard are not intended to prevent the use of alternative materials or methods of construction provided such alternatives meet the intent and requirements of this Standard.
- 1.4** Proposals for amendments to this Standard will be processed in accordance with the standards writing procedures of IAPMO.
- 1.5** The user’s attention is called to the possibility that compliance with this Standard may require use of an invention covered by patent rights. By publication of this Standard, no position is taken with respect to the validity of any such claim(s) or of any patent rights in connection therewith. If a patent holder has filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license, then details can be obtained from IAPMO.

2 Reference Publications

This Standard refers to the following publications, and where such reference is made, it shall be to the current edition of those publications, including all amendments published thereto.

ANSI Z97.1	Safety Glazing Materials Used in Buildings — Safety Performance Specifications and Methods of Test
