## Field-Assembled Tiling Kits

### 1 Scope

- 1.1** This Standard covers tiling kits intended to be assembled at the installation site and specifies requirements for materials, physical characteristics, performance testing, and markings. Tiling kits covered by this Standard are intended to be used for walls as well as shower receptors (i.e., floors).
- 1.2** The requirements of this Standard are not intended to prevent the use of alternative materials or methods of construction provided such alternatives meet the intent and requirements of this Standard.
- 1.3** Proposals for amendments to this Standard will be processed in accordance with the standards writing procedures of IAPMO.
- 1.4** The user’s attention is called to the possibility that compliance with this Standard might require use of an invention covered by patent rights. By publication of this Standard, no position is taken with respect to the validity of any such claim(s) or of any patent rights in connection therewith. If a patent holder has filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license, then details can be obtained from IAPMO.

### 2 Referenced Publications

This Standard refers to the following publications, and where such reference is made, it shall be to the current edition of those publications, including all amendments published thereto.

ANSI A108, A118, & A136 ANSI A118.10	Specifications for the Installation of Ceramic Tile Specifications for Load Bearing, Bonded, Waterproof Membranes for Thin-Set Ceramic Tile and Dimension Stone Installation
ASME A112.6.3	Floor and Trench Drains
ASME A112.18.2/CSA B125.2	Plumbing supply fittings
ASTM B209	Standard Specification for Aluminum and Aluminum-Alloy Sheet and Plate
ASTM C203	Standard Test Methods for Breaking Load and Flexural Properties of Block-Type Thermal Insulation
