CONTENTS

FOREWORD.....	6
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	9
4 Service conditions	15
4.1 Temperature of tap-changer environment.....	15
4.2 Temperature of motor-drive mechanism environment.....	16
4.3 Overload conditions	16
5 Requirements for on-load tap-changers	16
5.1 General requirements	16
5.1.1 Rating.....	16
5.1.2 Compartments for diverter and selector switches	17
5.1.3 Liquid-level gauges and gas monitoring devices	17
5.1.4 Safety requirements for protection against internal failure.....	17
5.1.5 Limiting devices for the protection against transient overvoltages	18
5.1.6 Change-over selector recovery voltages	18
5.1.7 Leakage inductance in coarse fine regulation arrangements	18
5.2 Type tests.....	18
5.2.1 General	18
5.2.2 Temperature rise of contacts	19
5.2.3 Switching tests	20
5.2.4 Short-circuit current test	25
5.2.5 Transition impedance test.....	26
5.2.6 Mechanical tests.....	27
5.2.7 Tightness test.....	29
5.2.8 Dielectric tests.....	30
5.2.9 Type-test certificate	35
5.3 Routine tests	35
5.3.1 General	35
5.3.2 Mechanical test	35
5.3.3 Sequence test	35
5.3.4 Auxiliary circuits insulation test.....	35
5.3.5 Pressure and vacuum tests.....	35
6 Requirements for motor-drive mechanisms for on-load tap-changers	35
6.1 General requirements	35
6.1.1 Compliance of component parts.....	35
6.1.2 Permissible variation of auxiliary supply	36
6.1.3 Step-by-step control	36
6.1.4 Tap position indicator	36
6.1.5 Tap-change in progress indication	36
6.1.6 Limiting devices.....	36
6.1.7 Parallel control devices.....	36
6.1.8 Direction of rotation protection.....	36
6.1.9 Overcurrent blocking device	36
6.1.10 Restarting device.....	37
6.1.11 Operation counter.....	37

6.1.12	Manual operation of the motor-drive mechanism	37
6.1.13	Motor-drive cubicle	37
6.1.14	Protective device against running-through	37
6.1.15	Protection against access to hazardous parts	37
6.2	Type tests	37
6.2.1	Mechanical load test	37
6.2.2	Overrun test	38
6.2.3	Degree of protection of motor-drive cubicle.....	38
6.3	Routine tests	38
6.3.1	Mechanical tests.....	38
6.3.2	Auxiliary circuits insulation test.....	38
7	Requirements for de-energized tap-changers	38
7.1	General requirements	38
7.1.1	Rated characteristics	38
7.1.2	Types	39
7.1.3	Handles and drives	39
7.1.4	Glands.....	39
7.1.5	Interlocks.....	39
7.1.6	Mechanical end stops	39
7.2	Type tests	40
7.2.1	General	40
7.2.2	Temperature rise of contacts	40
7.2.3	Short-circuit current test	41
7.2.4	Mechanical tests.....	41
7.2.5	Dielectric tests.....	42
7.2.6	Type test certificate	47
7.3	Routine tests	47
7.3.1	Mechanical tests.....	47
7.3.2	Pressure and vacuum tests.....	47
8	Requirements for motor-drive mechanisms for de-energized tap-changers	47
8.1	General requirements	47
8.1.1	General	47
8.1.2	Compliance of component parts.....	47
8.1.3	Permissible variation of auxiliary supply	47
8.1.4	Tap position indicator	47
8.1.5	Limiting devices.....	48
8.1.6	Operation counter.....	48
8.1.7	Manual operation of the motor-drive mechanism	48
8.1.8	Motor-drive cubicle	48
8.1.9	Protection against access to hazardous parts	48
8.2	Type tests	48
8.2.1	Mechanical load test.....	48
8.2.2	Overrun test	49
8.2.3	Degree of protection of motor-drive cubicle.....	49
8.3	Routine tests	49
8.3.1	Mechanical tests.....	49
8.3.2	Auxiliary circuits insulation test.....	49
9	Nameplate.....	49
9.1	Tap-changers (on-load and de-energized).....	49

9.2	Motor-drive mechanisms	50
10	De-energized tap-changer warning label.....	50
11	Manufacturers operating instructions	51
	Annex A (normative) Supplementary information on switching duty on main and transition contacts relating to resistor type tap-changers.....	52
	Annex B (normative) Supplementary information on switching duty relating to reactor type tap-changers	58
	B.1 Additional test parameters	58
	B.1.1 Service duty test.....	58
	B.1.2 Breaking capacity test	58
	B.2 Duty of switching contacts	58
	Annex C (normative) Method for determining the equivalent temperature of the transition resistor using power pulse current	69
	Annex D (informative) Simulated a.c. circuits for service duty and breaking capacity tests	70
	D.1 General.....	70
	D.2 Transformer method.....	70
	D.3 Resistance method	71
	Annex E (informative) Example of a synthetic test circuit for service duty test of vacuum type tap-changers	73
	E.1 Definitions with relevance to the synthetic test circuit.....	73
	E.1.1 Synthetic test circuit	73
	E.1.2 Simulated a.c. test circuit.....	73
	E.1.3 Pre-arc	73
	E.1.4 Making voltage	73
	E.2 Example for the test setup of a synthetic test circuit.....	73
	E.3 Example for the breaking/making condition during a switching operation.....	74
	Bibliography.....	76
	Figure 1 – Short-circuit test current (r.m.s. value) as a multiple of the maximum rated through-current (on-load tap-changer)	25
	Figure 2 – Time sequence for the application of test voltage (on-load tap-changer).....	34
	Figure 3 – Short-circuit test current (r.m.s. value) as a multiple of the maximum rated through-current (de-energized tap-changer).....	41
	Figure 4 – Time sequence for the application of test voltage (de-energized tap-changer)	46
	Figure 5 – Warning label (example)	50

Table B.3 – Duty of switching contacts for reactor type tap-changers with diverter switch and tap selector – Switching direction from P1 to P7	63
Table B.4 – Duty of switching contacts for reactor type tap-changers with vacuum interrupter and tap selector – Switching direction from P1 to P11	66

INTERNATIONAL ELECTROTECHNICAL COMMISSION

TAP-CHANGERS –

Part 1: Performance requirements and test methods

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60214-1 has been prepared by IEC technical committee 14: Power transformers.

This second edition cancels and replaces the first edition published in 2003. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- incorporation of requirements on vacuum type on-load tap-changers,
- incorporation of requirements on gas insulated tap-changers,
- changes in the type tests to fit with the service conditions,
- reference to the newest edition of IEC 60076-3:2013.

The text of this standard is based on the following documents:

CDV	Report on voting
14/746/CDV	14/767A/RVC

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 60214 series, published under the general title *Tap-changers*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

TAP-CHANGERS –

Part 1: Performance requirements and test methods

1 Scope

This part of IEC 60214 applies to on-load tap-changers of both resistor and reactor types, de-energized tap-changers, and their motor-drive mechanisms.

It applies mainly to tap-changers immersed in mineral insulating oil according to IEC 60296 but may also be used for tap-changers with air or gas insulation or immersed in other insulating liquids insofar as conditions are applicable.

It applies mainly to tap-changers with arcing contacts but may also be used for arcing-free on-load tap-changers (such as electronic switching) insofar as conditions are applicable.

This part of IEC 60214 applies to power and distribution transformers of all types and also to reactors.

It does not apply to transformers and reactors mounted on railway rolling stock.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
