**About the IEC**

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

**About IEC publications**

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

**IEC publications search -**

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

**IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

**IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

**IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)**

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

**Electropedia - [www.electropedia.org](http://www.electropedia.org)**

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## Coupling capacitors and capacitor dividers - Part 1: General rules

### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60358-1 has been prepared by IEC Technical Committee 33: Power capacitors and their applications. It is an International Standard.

This second edition cancels and replaces the first edition published in 2012. This edition constitutes a technical revision.

This edition of IEC 60358-1 includes the following significant technical changes with respect to the previous edition:

- a) new terms and definitions are presented in Clause 3;
- b) new definitions in Clause 4 and Clause 5;
- c) gas-insulated coupling capacitors and capacitor dividers are integrated in Clause 6;
- d) new tests in routine, type, special and design test sections are introduced, see Clause 7;
- e) new Clause 8, Clause 9 and Clause 10;

This is a preview of IEC 60358-1 Ed. 2.0 en:2025. Click here to purchase the full version from the ANSI store.

The text of this International Standard is based on the following documents:

Draft	Report on voting
33/732/FDIS	33/737/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

A list of all parts in the IEC 60358 series, published under the general title *Coupling capacitors and capacitor dividers*, can be found on the IEC website.

IEC 60358-1, *Coupling capacitors and capacitor dividers - Part 1: General rules*

IEC 60358-2, *Coupling capacitors and capacitor dividers - Part 2: AC or DC single-phase coupling capacitor connected between line and ground for power line carrier-frequency (PLC) application*

IEC 60358-3, *Coupling capacitors and capacitor dividers - Part 3: AC or DC single-phase coupling capacitor for harmonic-filters applications*

IEC 60358-4, *Coupling capacitors and capacitor dividers - Part 4: DC or AC single-phase capacitor dividers*

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

This document is the first revision of IEC 60358-1, defining general rules for coupling capacitors and capacitor dividers.

The main modifications of this revision are listed below:

- terms and definitions:
  - new terms and definitions are presented in Clause 3;
- normal and special environmental conditions:
  - new definitions in Clause 4 are introduced;
- ratings:
  - addition of HV insulation levels above 800 kV;
  - new definition on rated voltage  $U_r$  for AC and DC applications;
  - Clause 5, new definitions for DC application are integrated;
  - new standard values of rated voltages are defined;
- design and construction:
  - clarification of the altitude correction for external insulation and dielectric tests;
  - external insulation requirements for DC application;
  - gas-insulated coupling capacitors and capacitor dividers are integrated in Clause 6;
  - new test with its requirements on capacitor element ageing is defined;
- type tests:
  - temperature rise test: more accurate definition of the test duration;
  - lightning impulse test: new test procedure (15 impulses) for  $U_m \geq 300$  kV;
  - mechanical test: moved from special test to type test;
  - new enclosure tightness test for gas-insulated coupling capacitors and dividers;
- routine tests:
  - tightness tests for gas-insulated equipment;
  - gas dew point measurements;
  - new flowchart of routine tests presented in Figure 3;
- special tests:
  - determination of temperature coefficient of the capacitor element;
  - new enclosure tightness test on low and hot temperature;
  - information about internal arc tests;
  - information about multiple chopped impulse tests;
  - new test on impedance measurements depending on frequency;
  - new test on thermal stability;
  - new test on corrosion;
  - new flowchart of type tests presented in Figure 4;
- design tests (new clause):
  - ageing tests of capacitor elements;

This is a preview of IEC 60358-1 Ed. 2.0 en:2025. [Click here to purchase the full version from the ANSI store.](#)

- new installation inspection;
- gas dew point test moved from special test to commissioning tests;
- rules for transport, storage, erection, operation and maintenance:
  - new mandatory rules for user and manufacturer;
  - new conditions for transportation and storage;
- new annexes:
  - Annex D (informative): provide information about superimposed impulse voltages;
  - Annex E (informative): provide information on test setups for superimposed impulse voltage tests;
  - Annex F (informative): is introduced on high-frequency characteristic measurements;
  - Annex G (informative): provide information about composite AC/DC voltages;
  - Annex H (informative): present a summary of all voltages used in DC application.

This part of IEC 60358 applies to:

- Coupling capacitors and capacitor dividers, with rated voltage > 1 000 V, connected line to ground with the low-voltage terminal either permanently earthed or connected to devices, for applications listed hereunder and other similar uses.

This document serves as a basic standard for the coupling capacitors and capacitor dividers. The different parts of this standard series will present the supplementary specifications and tests, for example IEC 60358-2, IEC 60358-3 or IEC 60358-4.

Diagrams of coupling capacitor and capacitor divider to which this standard series applies are given in Figure A.1 and Figure A.2 (see Annex A).
