## CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references .....	6
3 Terms, definitions, symbols and units .....	6
4 Measurement conditions.....	7
4.1 Standard measurement environmental conditions .....	7
4.2 Standard measurement darkroom conditions.....	8
4.3 Standard measurement locations .....	8
5 Measurement methods of on-screen properties .....	8
5.1 Measurement equipment and its setup .....	8
5.2 Measurement methods.....	9
6 Measurement methods of through-screen properties .....	10
6.1 Luminous transmittance and its uniformity .....	10
6.1.1 Purpose.....	10
6.1.2 Measurement conditions.....	10
6.1.3 Measurement methods .....	10
6.2 Transmitted haze .....	11
6.2.1 Purpose.....	11
6.2.2 Measurement conditions.....	11
6.2.3 Test apparatus .....	11
6.2.4 Procedure.....	13
6.2.5 Results .....	14
6.2.6 Reporting.....	14
6.3 Colour shift .....	14
6.3.1 Purpose.....	14
6.3.2 Measurement conditions.....	14
6.3.3 Test apparatus .....	14
6.3.4 Procedure.....	15
6.3.5 Reporting.....	15
6.4 Contrast ratio offset .....	16
6.4.1 Purpose.....	16
6.4.2 Measurement conditions.....	16
6.4.3 Test apparatus .....	16
6.4.4 Procedure.....	16
6.4.5 Reporting.....	17
6.5 Sharpness .....	17
6.5.1 Purpose.....	17
6.5.2 Measuring conditions.....	17
6.5.3 Test apparatus .....	17
6.5.4 Procedure.....	18
6.5.5 Results .....	18
6.5.6 Reporting.....	20
6.6 MTF and Michelson contrast ratio .....	20
6.6.1 Purpose.....	20
6.6.2 Measurement conditions.....	20
6.6.3 Measurement methods .....	20

6.6.4	Reporting.....	22
7	Contrast ratio and colour coordinates with the incident illumination originating from objects behind the screen.....	22
7.1	Purpose.....	22
7.2	Measurement method with white light source.....	24
7.2.1	General.....	24
7.2.2	Measurement conditions.....	24
7.2.3	Measurement method.....	24
7.3	Measurement method with collimated or directional light source.....	25
7.3.1	Purpose.....	25
7.3.2	Measurement conditions.....	25
7.3.3	Measurement method background.....	26
7.3.4	Measurement method.....	26
	Bibliography.....	27
	Figure 1 – Measurement points.....	8
	Figure 2 – Measurement equipment and its configuration.....	9
	Figure 3 – Measurement configuration with light source.....	10
	Figure 4 – Schematic arrangement of the apparatus (TOP view).....	13
	Figure 5 – Measurement system and its configuration.....	15
	Figure 6 – Reference object and its configuration.....	16
	Figure 7 – Example reference object and its configuration.....	18
	Figure 8 – Luminance curve of reference object.....	19
	Figure 9 – Definition of test parameters.....	20
	Figure 10 – Reference object and its configuration.....	21

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## LIQUID CRYSTAL DISPLAY DEVICES –

**Part 30-5: Optical measuring methods of transmissive transparent LCD modules**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61747-30-5 has been prepared by IEC technical committee 110: Electronic display devices.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
110/1047/FDIS	110/1070/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 61747 series, under the general title *Liquid crystal display devices*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## LIQUID CRYSTAL DISPLAY DEVICES –

### Part 30-5: Optical measuring methods of transmissive transparent LCD modules

#### 1 Scope

This part of IEC 61747 specifies the standard measurement conditions and measuring methods for determining the optical properties of transparent liquid crystal display modules which operate in a transmissive mode.

More specifically, this document focuses on three particular aspects of the transparent properties, i.e. transmittance, haze, and image distortion.

#### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61747-1-2, *Liquid crystal display devices – Part 1-2: Generic – Terminology and letter symbols*

IEC 61747-30-1, *Liquid crystal display devices – Part 30-1: Measuring methods for liquid crystal display modules – Transmissive type*

ISO 11664-1, *Colorimetry – Part 1: CIE standard colorimetric observers*

ISO 11664-2, *Colorimetry – Part 2: CIE standard illuminants*

ISO 14782, *Plastics: Determination of haze for transparent materials*
