FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references	9
3 Terms and definitions	12
4 General requirements	15
4.1 Environmental conditions	15
4.1.1 General	15
4.1.2 Ambient air temperature	15
4.1.3 Temperature rise	15
4.1.4 Vibration.....	15
4.2 Degree of protection.....	16
4.3 Nameplates and labels	16
4.4 Voltage and frequency variations.....	16
4.5 Electromagnetic compatibility	17
4.6 Terminations	17
5 Generators and motors.....	17
5.1 General	17
5.2 Voltage regulation of generators.....	17
5.2.1 General	17
5.2.2 DC generators	18
5.2.3 AC generators	18
5.3 Generators for special purposes.....	19
5.3.1 DC generators	19
5.3.2 AC generators	19
5.4 Parallel operation of general service generators – AC generators.....	19
5.4.1 Reactive load sharing	19
5.4.2 Load sharing	19
5.4.3 Flywheel effect for a.c. generators.....	19
5.4.4 Excitation of a.c. generators	20
5.5 Mechanical features (generators and motors).....	20
5.5.1 Entry of water.....	20
5.5.2 Accumulation of moisture and condensation	20
5.5.3 Balance	20
5.5.4 Shaft currents.....	20
5.5.5 Terminals	21
5.6 Lubrication (generators and motors).....	21
5.7 Prime movers	21
5.7.1 General	21
5.7.2 Speed governing characteristics	21
5.7.3 Flywheel effect	22
5.8 Cyclic irregularity	22
5.9 Lubrication (prime movers).....	22
5.10 Running speed	23
5.11 Testing.....	23

6	Transformers for power and lighting	23
6.1	General	23
6.2	Winding arrangement	24
6.3	Terminals	24
6.4	Cooling arrangement	24
6.5	Voltage regulation	24
6.6	Tests	24
7	Switchgear and controlgear assemblies	25
7.1	Service conditions	25
7.2	Definitions	25
7.3	Locking facilities	25
7.4	Low-voltage switchgear and controlgear assemblies	25
7.4.1	General	25
7.4.2	Temperature rise	25
7.4.3	Circuits	25
7.4.4	Marking of parts	26
7.4.5	Design and construction	26
7.4.6	Barriers between generator sections	28
7.4.7	Internal electrical circuits and connections	28
7.4.8	Design verification	29
7.5	Switchgear and controlgear in the range above 1 kV up to and including 35 kV	30
7.5.1	General	30
7.5.2	Service conditions	30
7.5.3	Ratings	30
7.5.4	Design and construction	30
7.5.5	Degree of protection provided by enclosures	30
7.5.6	Circuit breakers, switches and fuses	30

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MOBILE AND FIXED OFFSHORE UNITS – ELECTRICAL INSTALLATIONS –

Part 3: Equipment

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61892-3 has been prepared by IEC technical committee 18: Electrical installations of ships and of mobile and fixed offshore units.

This third edition cancels and replaces the second edition published in 2007. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Table 4 in the previous edition of IEC 61892-3 regarding type testing has been deleted. Information regarding environmental conditions, including requirements to vibration, is now given in Clause 4;
- b) for liquid immersed transformers requirement for overheating alarm and shut down has been added;

This is a preview of "IEC 61892-3 Ed. 3.0 ...". [Click here to purchase the full version from the ANSI store.](#)

- c) requirements for low voltage switchgear and controlgear have been rewritten, based on IEC 61439-1 and IEC 61439-2. Only additional requirements to those given in IEC 61439 are given in the standard;
- d) requirements to low voltage circuit breakers, switches, contactors and fuses have been added;
- e) requirement for subdivision of high voltage switchboard has been added;
- f) requirements for luminaires have been deleted and replaced with reference to IEC 60598 series and IEC 60092-306;
- g) requirements for heating and cooking appliances have been deleted and replaced with reference to IEC 60335 series;
- h) requirement for portable equipment has been added.

The text of this standard is based on the following documents:

FDIS	Report on voting
18/1241/FDIS	18/1256/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts of the IEC 61892 series, under the general title *Mobile and fixed offshore units – Electrical installations*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

This is a preview of "IEC 61892-3 Ed. 3.0 ...". [Click here to purchase the full version from the ANSI store.](#)

INTRODUCTION

IEC 61892 forms a series of International Standards intended to enable safety in the design, selection, installation, maintenance and use of electrical equipment for the generation, storage, distribution and utilisation of electrical energy for all purposes in offshore units which are being used for the purpose of exploration or exploitation of petroleum resources.

This part of IEC 61892 also incorporates and co-ordinates, as far as possible, existing rules and forms a code of interpretation, where applicable, of the requirements of the International Maritime Organisation (IMO), a guide for future regulations which may be prepared and a statement of practice for offshore unit owners, constructors and appropriate organisations.

This standard is based on equipment and practices which are in current use but it is not intended in any way to impede the development of new or improved techniques.

The ultimate aim has been to produce a set of International standards exclusively for the offshore petroleum industry.

MOBILE AND FIXED OFFSHORE UNITS – ELECTRICAL INSTALLATIONS –

Part 3: Equipment

1 Scope

This part of IEC 61892 contains provisions for electrical equipment in mobile and fixed offshore units including pipeline, pumping or 'pigging' stations, compressor stations and exposed location single buoy moorings, used in the offshore petroleum industry for drilling, processing and for storage purposes.

This standard applies to equipment in all installations, whether permanent, temporary, transportable or hand-held, to a.c. installations up to and including 35 000 V and d.c. installations up to and including 1 500 V (a.c. and d.c. voltages are nominal values).

This standard sets requirements for equipment, which are additional to the requirements given in the product standard for the relevant equipment.

This standard does not apply to the electrical installations in rooms used for medical purposes or in tankers.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
