STANDARD 15041

First edition
1997-04-15

**Stabilized as
INCITS/ISO/IEC 15041:1997[S2012]**

Information technology — Data interchange on 90 mm optical disk cartridges — Capacity: 640 Mbytes per cartridge

Technologies de l'information — Échange de données sur cartouches de disque optique de 90 mm *— Capacité:* 640 Mbytes *par cartouche*

Adopted by INCITS (InterNational Committee for Information Technology Standards) as an American National Standard.

Date of ANSI Approval: 9/25/97

Published by American National Standards Institute,
25 West 43rd Street, New York, New York 10036

4.25 optical disk 3
4.26 optical disk cartridge (ODC) 3
4.27 partially embossed disk 3
4.28 physical track 3
4.29 physical track group 3
4.30 pitch 3
4.31 polarization 3
4.32 read power 3
4.33 recording layer 3
4.34 Reed-Solomon code 3
4.35 sector 3
4.36 space 3
4.37 spindle 4
4.38 substrate 4
4.39 zone 4

5 Conventions and notations 4
5.1 Representation of numbers 4
5.2 Names 4

6 List of acronyms 4

7 General description of the optical disk cartridge 5

8 General requirements 5
8.1 Environments 5
8.1.1 Testing environment 5
8.1.2 Operating environment 5
8.1.3 Storage environment 6
8.1.4 Transportation 6
8.2 Temperature shock 6
8.3 Safety requirements 6
8.4 Flammability 6

9 Reference Drive 6
9.1 Optical system 6
9.2 Optical beam 8
9.3 Read channels 8
9.4 Tracking 8
9.5 Rotation of the disk 9

Section 2 - Mechanical and physical characteristics 9

10 Dimensional and physical characteristics of the case 9
10.1 General description of the case 9
10.2 Reference planes of the case 9
10.3 Dimensions of the case 9
10.3.1 Overall dimensions 9
10.3.2 Location hole 10
10.3.3 Alignment hole 10
10.3.4 Reference surfaces 10
10.3.5 Detents 11
10.3.6 Functional Areas 11
10.3.7 Spindle and head windows 12

This is a preview of "INCITS/ISO/IEC 15041...". Click here to purchase the full version from the ANSI store.

10.3.8 Shutter 13
10.3.9 Path for shutter opener and shutter sensor notch 13
10.3.10 Mis-insert protections 14
10.3.11 Gripper slots 14
10.3.12 Label area 15
10.4 Mechanical characteristics 15
10.4.1 Material 15
10.4.2 Mass 15
10.4.3 Edge distortion 15
10.4.4 Compliance 15
10.4.5 Shutter opening force 15

11 Dimensional, mechanical and physical characteristics of the disk 27
11.1 General description of the disk 27
11.2 Reference axis and plane of the disk 27
11.3 Dimensions of the disk 27
11.3.1 Hub dimensions 27
11.3.2 Clamping zone 28
11.4 Mechanical characteristics 28
11.4.1 Material 28
11.4.2 Mass 29
11.4.3 Moment of inertia 29
11.4.4 Imbalance 29
11.4.5 Axial deflection 29
11.4.6 Axial acceleration 30
11.4.7 Radial runout 30
11.4.8 Radial acceleration 30
11.4.9 Tilt 30
11.5 Optical Characteristics 31
11.5.1 Index of refraction 31
11.5.2 Thickness of the substrate 31
11.5.3 Birefringence 31
11.5.4 Vertical Birefringence 31
11.5.5 Reflectance 31

12 Interface between cartridge and drive 32
12.1 Clamping method 32
12.2 Clamping force 32
12.3 Capture cylinder 32
12.4 Disk position in operating condition 32

Section 3 - Format of information 34

13 Geometry of physical tracks 34
13.1 Physical track shape 34
13.2 Direction of track spiral 34
13.3 Physical track pitch 34

14 Track format 34
14.1 Logical Track number 34
14.2 Logical Track layout 34
14.3 Clock frequencies and periods 34
14.4 Radial alignment 35

This is a preview of "INCITS/ISO/IEC 15041...". Click here to purchase the full version from the ANSI store.

14.5 Sector number 35

15 Sector format 35
15.1 Sector layout 35
15.2 Sector Mark (SM) 36
15.3 VFO fields 38
15.4 Address Mark (AM) 38
15.5 ID fields 39
15.6 Postambles (PA) 39
15.7 Gap 39
15.8 Sync 40
15.9 Data field 40
15.9.1 User data bytes 40
15.9.2 CRC and ECC bytes 40
15.9.3 Resync bytes 40
15.10 Buffer field 40

16 Recording code 41

17 Format of the Information Zone 42
17.1 General description of the Information Zone 42
17.2 Division of the Information Zone 42
17.2.1 Initial Zone 42
17.2.2 Acquire Zone 42
17.2.3 Test Zones 42
17.2.4 Control Zone 44
17.2.5 Data Zone 44
17.2.6 Buffer Zones 45

18 Format of the Data Zone 45
18.1 Buffer tracks and Test tracks in the Data Zone 46
18.2 Defect Management Areas (DMAs) 46
18.3 Disk Definition Structure (DDS) 47
18.3.1 Fully rewritable disks 49
18.3.2 Fully embossed disks 49
18.3.3 Partially embossed disks 50
18.4 Partitioning 50
18.4.1 Fully rewritable disks 50
18.4.2 Partially embossed disks 50
18.4.3 Fully embossed disks 50

19 Defect management 52
19.1 Rewritable groups: Spare sectors 52
19.1.1 Initialization of the disk 52
19.1.2 Certification 52
19.1.3 Disks not certified 52
19.1.4 Write procedure 53
19.1.5 Primary Defect List (PDL) 53
19.1.6 Secondary Defect List (SDL) 53
19.2 Embossed groups: Parity sectors 54

This is a preview of "INCITS/ISO/IEC 15041...". Click here to purchase the full version from the ANSI store.

Section 4 - Characteristics of embossed information 56

20 Method of testing 56
20.1 Environment 56
20.2 Use of the Reference Drive 56
20.2.1 Optics and mechanics 56
20.2.2 Read power 56
20.2.3 Read channels 56
20.2.4 Tracking 56
20.3 Definition of signals 56

21 Signals from grooves 58
21.1 Cross-track signal 58
21.2 Cross-Track minimum signal 58
21.3 Push-pull signal 58
21.4 Divided push-pull signal 59
21.5 Phase depth 59
21.6 Track location 59

22 Signals from Headers 60
22.1 Sector Mark 60
22.2 VFO1 and VFO2 60
22.3 Address Mark, ID field and Postamble 60
22.4 Timing jitter 60

23 Signals from embossed Recording fields 60
23.1 Signal amplitude 60
23.2 Modulation method offset 61
23.3 Timing jitter 61

Section 5 - Characteristics of the recording layer 62

24 Method of testing 62
24.1 Environment 62
24.2 Reference Drive 62
24.2.1 Optics and mechanics 62
24.2.2 Read power 62
24.2.3 Read channel 62
24.2.4 Tracking 62
24.2.5 Signal detection for testing purposes 62
24.3 Write conditions 62
24.3.1 Write pulse and power 62
24.3.2 Write magnetic field 65
24.3.3 2 T and 4 T pulse power determination 65
24.3.4 Media power sensitivity 65
24.4 Erase conditions 65
24.4.1 Erase power 66
24.4.2 Erase magnetic field 66
24.5 Definition of signals 66

25 Magneto-optical characteristics 66
25.1 Figure of merit 66
25.2 Imbalance of the magneto-optical signal 66

This is a preview of "INCITS/ISO/IEC 15041...". Click here to purchase the full version from the ANSI store.

26 Write characteristics 67
26.1 Resolution 67
26.2 Narrow-band signal-to-noise ratio 67
26.3 Cross-talk ratio 68
26.3.1 Rewritable track test method 68
26.4 Timing Jitter 68
26.5 Media thermal interaction 68

27 Erase power determination 69

Section 6 - Characteristics of user data 70

28 Method of testing 70
28.1 Environment 70
28.2 Reference Drive 70
28.2.1 Optics and mechanics 70
28.2.2 Read power 70
28.2.3 Read amplifiers 70
28.2.4 Mark Quality 70
28.2.5 Channel bit clock 71
28.2.6 Binary-to-digital converters 71
28.2.7 Error correction 71
28.2.8 Tracking 71

29 Minimum quality of a sector 71
29.1 Headers 71
29.1.1 Sector Mark 71
29.1.2 ID fields 71
29.2 User-written data 71
29.2.1 Recording field 71
29.2.2 Byte errors 71
29.2.3 Modulation method offset 71
29.2.4 Timing jitter 72
29.3 Embossed data 72
29.3.1 Byte errors 72

30 Data interchange requirements 72
30.1 Tracking 72
30.2 User-written data 72
30.3 Embossed data 72
30.4 Quality of disk 72

Annexes

A - Edge distortion test 73

B - Compliance test 75

C - CRC for ID fields 77

D - Interleave, CRC, ECC, Resync for the data field 78

E - Contents of the Control Zone 84

F - Determination of the Resync patterns 91

G - Measurement of the figure of merit 96

This is a preview of "INCITS/ISO/IEC 15041...". Click here to purchase the full version from the ANSI store.

H - Read Channel for measuring NBSNR and jitter **97**

J - Implementation Independent Mark Quality Determination (IIMQD) for the interchange of recorded media **100**

K - Air cleanliness class 100 000 **102**

L - Position of the cartridge relative to the reference planes **103**

M - Relaxation by zones of the requirements for signals **104**

N - Test method for measuring the adsorbent force of the hub **105**

P - Measurement implementation for Cross-track signal **107**

Q - Track deviation measurement **108**

R - Derivation of the operating climatic environment **112**

S - Transportation **117**

T - Office environment **118**

U - Values to be implemented in existing and future standards **119**

V - Measurement of the vertical birefringence of the substrate **120**

W - Sector retirement guidelines **122**

X - Laser power calibration for evaluation of media power sensitivity **123**
