Where IT all begins

American National Standard

Approval of an American National Standard requires review by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Contents	Page
Foreword	iv
Introduction	vi
1 Scope	1
2 Normative references	1
3 Principles	2
3.1 Specification	2
3.2 Mapping of PHIGS function names to FORTRAN subroutine names	2
3.3 Parameters	2
3.4 The FORTRAN subset	2
3.5 Error handling	3
4 Generating FORTRAN subroutine names	4
5 Data types	8
6 Enumeration types	17
7 List of the PHIGS function names	24
7.1 List of functions ordered alphabetically by bound name	24
7.2 List of functions ordered alphabetically by PHIGS function name	29
8 PHIGS errors specific to the FORTRAN binding	35
9 The PHIGS function interface	36
9.1 General principles	36
9.2 Control functions	37
9.3 Output primitive functions	39
9.4 Attribute specification functions	44
9.4.1 Bundled attribute selection	44
9.4.2 Individual attribute selection	45
9.4.3 Aspect source flag setting	50
9.4.4 Workstation attribute table definition	50
9.4.5 Workstation filter definition	52
9.4.6 Colour model control	53
9.4.7 HLHSR attributes	53
9.5 Transformation functions	54
9.5.1 Modelling transformations	54
9.5.2 View operations	55
9.5.3 Workstation transformation	56
9.5.4 Utility functions to support modelling	57
9.5.5 Utility functions to support viewing	62
9.6 Structure content functions	64
9.7 Structure manipulation functions	67
