## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 17998 was prepared by The Open Group and was adopted, under the PAS procedure, by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, in parallel with its approval by national bodies of ISO and IEC.

## Contents

1	Introduction.....	1
1.1	Objective.....	1
1.2	Overview.....	1
1.3	Conformance.....	2
1.4	Terminology.....	3
1.5	Future Directions .....	4
2	Background.....	6
2.1	SOA Challenges and Goals.....	6
2.2	SOA Governance .....	7
3	SOA Governance .....	9
3.1	SOA Governance Definition.....	9
3.2	SOA Governance Scope .....	10
3.3	SOA Governance Framework.....	10
3.3.1	SOA Governance Reference Model (SGRM) .....	11
3.3.2	SOA Governance Vitality Method (SGVM).....	11
4	SOA Governance Reference Model (SGRM).....	12
4.1	SOA Governance Guiding Principles .....	12
4.2	SOA Governing Processes.....	15
4.2.1	Compliance.....	15
4.2.2	Dispensation .....	16
4.2.3	Communication .....	16
4.3	Governed SOA Processes .....	18
4.3.1	Service Portfolio Management .....	19
4.3.2	Service Lifecycle Management .....	20
4.3.3	Solution Portfolio Management .....	21
4.3.4	SOA Solution Lifecycle .....	22
4.4	SOA Governance Roles and Responsibilities.....	24
4.5	SOA Governance Process Artifacts.....	27
4.6	SOA Governance Technology .....	29
5	SOA Governance Vitality Method (SGVM).....	30
5.1	Plan Phase.....	31
5.1.1	Understand Current Governance Structures .....	31
5.1.2	Assess SOA Maturity .....	32
5.1.3	Develop SOA Governance Vision and Strategy.....	33
5.1.4	Develop SOA Governance Scope .....	33
5.1.5	Develop SOA Governance Principles .....	33
5.1.6	Develop SOA Governance Roadmap.....	34

5.2	Define Phase .....	34
5.2.1	Define Governed SOA Processes .....	35
5.2.2	Define Governing SOA Processes.....	36
5.2.3	Collect SOA Guidelines and Standards.....	36
5.2.4	Define SOA Governance Organization, Roles, and Responsibilities .....	36
5.2.5	Define SOA Governance Information Artifacts .....	36
5.2.6	Define SOA Governance Environment .....	37
5.2.7	Create Transition Plans .....	37
5.3	Implement Phase.....	38
5.3.1	SOA Governance Organization Transition Plan Implementation.....	39
5.3.2	SOA Governance Process Transition Plan Implementation.....	40
5.3.3	SOA Governance Technology Transition Plan Implementation.....	40
5.4	Monitor Phase .....	41
5.4.1	Monitor and Evaluate SOA Governed Processes .....	42
5.4.2	Monitor and Evaluate SOA Governing Processes.....	42
5.4.3	Monitor External Changes.....	42
5.4.4	Monitor and Evaluate SOA Guidelines Development .....	43
5.5	SGVM Use of SOA Governance Artifacts .....	43
A	SOA Governance Process Activities.....	45
A.1	SOA Governing Processes .....	45
A.2	SOA Governed Processes .....	48
B	SOA Governance Process Information Entities .....	72
B.1	SOA Governing Process Artifacts .....	73
B.2	SOA Governed Process Artifacts.....	73
B.3	SGVM Artifacts .....	79
C	SOA Governance Metrics Example .....	81
D	Relationships with Other SOA Standards .....	83

## Preface

### The Open Group

The Open Group is a vendor-neutral and technology-neutral consortium, whose vision of Boundaryless Information Flow™ will enable access to integrated information within and between enterprises based on open standards and global interoperability. The Open Group works with customers, suppliers, consortia, and other standards bodies. Its role is to capture, understand, and address current and emerging requirements, establish policies, and share best practices; to facilitate interoperability, develop consensus, and evolve and integrate specifications and Open Source technologies; to offer a comprehensive set of services to enhance the operational efficiency of consortia; and to operate the industry's premier certification service, including UNIX® certification.

Further information on The Open Group is available at [www.opengroup.org](http://www.opengroup.org).

The Open Group has over 15 years' experience in developing and operating certification programs and has extensive experience developing and facilitating industry adoption of test suites used to validate conformance to an open standard or specification.

More information is available at [www.opengroup.org/certification](http://www.opengroup.org/certification).

The Open Group publishes a wide range of technical documentation, the main part of which is focused on development of Technical and Product Standards and Guides, but which also includes white papers, technical studies, branding and testing documentation, and business titles. Full details and a catalog are available at [www.opengroup.org/bookstore](http://www.opengroup.org/bookstore).

As with all *live* documents, Technical Standards and Specifications require revision to align with new developments and associated international standards. To distinguish between revised specifications which are fully backwards-compatible and those which are not:

- A new *Version* indicates there is no change to the definitive information contained in the previous publication of that title, but additions/extensions are included. As such, it *replaces* the previous publication.
- A new *Issue* indicates there is substantive change to the definitive information contained in the previous publication of that title, and there may also be additions/extensions. As such, both previous and new documents are maintained as current publications.

Readers should note that updates – in the form of Corrigenda – may apply to any publication. This information is published at [www.opengroup.org/corrigenda](http://www.opengroup.org/corrigenda).

### This Document

This document is the Technical Standard for the SOA Governance Framework. It has been developed by the SOA Governance project of The Open Group SOA Working Group.
