TECHNICAL CORRIGENDUM 2

Technologies de l'information — Techniques de sécurité — Code de bonne pratique pour le management de la sécurité de l'information

RECTIFICATIF TECHNIQUE 2

Technical Corrigendum 2 to ISO/IEC 27002:2013 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*

Replace

Implementation Guidance

New and updated systems require thorough testing and verification during the development processes, including the preparation of a detailed schedule of activities and test inputs and expected outputs under a range of conditions. For in-house developments, such tests should initially be performed by the development team. Independent acceptance testing should then be undertaken (both for in-house and for outsourced developments) to ensure that the system works as expected and only as expected (see 14.1.1 and 14.1.9). The extent of testing should be in proportion to the importance and nature of the system.
