

IPC-1752A-WAM1,2 & 3
with Amendments 1, 2 and 3

Materials Declaration Management Standard

Developed by the Materials Declaration Task Group (2-18b) of the
Supplier Declaration Subcommittee (2-18) of IPC

Supersedes:

IPC-1752A with Amendment 1
and 2 - February 2014
IPC-1752A with Amendment 1 -
November 2012
IPC-1752A - February 2010

Users of this publication are encouraged to participate in the
development of future revisions.

Table of Contents

1 SCOPE	1	6.3.1 Reporting Compliance at the Homogenous Material Level, Example is EU RoHS	9
1.1 Purpose	1	6.3.2 Reporting Compliance at Levels Other Than the Homogeneous Material Level, Example is Article-Level Reporting for EU REACH Candidate List	10
1.2 Classes	1	6.4 Material Composition Declaration – Homogeneous Material Level (Class D)	11
2 APPLICABLE DOCUMENTS	2	6.4.1 Homogeneous Material Name	11
2.1 IPC	2	6.4.2 Material Group Name	11
2.2 European Union (EU) Restrictions on Hazardous Substances (RoHS) Directive	2	6.4.3 Substance Category	11
2.3 International Electrotechnical Commission (IEC) Standards	2	6.4.4 Substance	11
2.4 Joint Industry Guide-101 (JIG-101)	2	6.5 Other Documentation and Attachments	13
2.5 REACH (Registration, Evaluation, Authorization and Restriction of Chemicals)	2	7 IMPLEMENTATION GUIDELINES	14
2.6 RosettaNet	2	7.1 Applicability of 1751 Section 9	14
3 REQUIREMENTS	3	7.2 1752 Rules to Extend Schema Constraints	14
3.1 Terms and Definitions	3	Appendix A Field Mapping and Descriptions	16
3.1.1 Homogeneous Material	3	Appendix B RoHS Substances and Exemptions List	20
3.1.2 Intentionally Added	3	Appendix C JIG-101 Material Composition Declaration for Electronic Products List	34
3.1.3 Material	3	Appendix D REACH Candidate List Substances	37
3.1.4 Product	3	Appendix E REACH Substance Restrictions	44
3.1.5 Requester	3	Appendix F IEC 62474 – Material Declaration for Products of and for the Electro-technical Industry	
3.1.6 Subproduct	3	Appendix G Verification Guidance	53
3.1.7 Substances	3	Appendix H Previous Versions of IPC-175X	54
3.1.8 Supplier	3		
3.1.9 Threshold Level	3	Figures	
4 DATA MODEL	4	Figure 4-1 Design Data Model for IPC-1752 Material Declaration Requirements	4
5 MULTIPLE PRODUCT SUPPORT	5		
6 DESCRIPTION OF THE DATA FIELDS	7	Tables	
6.1 Declaration Query/Reply (Class A)	7	Table 1-1 Material Declaration Classification	1
6.1.1 EU RoHS	7	Table A1-1 Field Attributes of Product Information Section	16
6.1.2 The IEC 62474 Database of Restricted and Declarable Substances (NB - put this fourth in the list)	8	Table A1-2 Field Attributes of Class A Query List	16
6.1.3 REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals)	8	Table A1-3 IEC 62474 Material Classes	17
6.1.4 Custom Query	8	Table A1-4 Field Attributes of Class B Material Classes	17
6.2 Material Class Declaration (Class B)	9	Table A1-5 Field Attributes of Class C Material Declaration	18
6.2.1 Material Class List	9	Table A1-6 Field Attributes of Class D Declaration	19
6.2.2 Material Class Name	9		
6.2.3 Material Class ID	9		
6.2.4 Mass	9		
6.2.5 Unit Measure	9		
6.3 Substance Category Compliance Declaration – Product Level (Class C)	9		

Materials Declaration Management

1 SCOPE

This standard establishes the requirements for exchanging material and substance data between suppliers and their customers for electrical and electronic product. This standard applies to products, components, subproducts and materials that are supplied to producers of electrical and electronic products for incorporation into their products. It covers materials and substances that may be present in the supplied product or subproduct. It does not apply to process chemicals, unless those process chemicals constitute part of the finished product or subproduct.

This standard applies to business-to-business transactions. It is not intended to be used by the general public when making purchasing decisions. The standard is not a compliance guide. As revisions to the European Union’s Restriction of Hazardous Substances (RoHS) Directive and the European Union’s REACH Regulation are released, this standard will be updated. Exemptions are for specific applications as defined, and management of usage and expirations are between the requester and the supplier.

1.1 Purpose This standard is intended to benefit suppliers and their customers by providing consistency and efficiency to the material declaration process. It establishes standard electronic data exchange formats that will facilitate and improve data transfer along the entire global supply chain.

1.2 Classes This standard establishes four classes for declaration of materials. Classes may be combined as desired.

Table 1-1 Material Declaration Classification

Class	Description	Declaration Type	Detailed Requirements
A	– Reporting in Query/Reply format	Query/Reply	– Supplier provides responses to standard queries and/or optional custom queries as shown in Section 6-1.
B	– Material class reporting	Material Class	– Supplier states the amount of different classes of materials within a product.
C	– Substance category reporting at the product level	Substance category compliance declaration	– Supplier provides mass and/or concentration of substance category at the product level if above thresholds.
D	– Substances reporting at the homogeneous material level	Substance composition disclosure	– Supplier provides location, mass, substances at homogeneous material level.
