

ANSI/ISA-S75.16-1994

Approved April 24, 1994

American National Standard

**Face-to-Face Dimensions
for Flanged Globe-Style
Control Valve Bodies
(ANSI Classes 900, 1500,
and 2500)**

ANSI/ISA-S75.16, Face-to-Face Dimensions for Flanged Globe-Style Control Valve Bodies
(ANSI Classes 900, 1500, and 2500)

ISBN 1-55617-481-0

Research Triangle Park, North Carolina 27709

Preface

This preface is included for informational purposes and is not part of ISA-S75.16.

This standard has been prepared as part of the service of ISA toward a goal of uniformity in the field of instrumentation. To be of real value, this document should not be static, but should be subject to periodic review. Toward this end, the Society welcomes all comments and criticisms, and asks that they be addressed to the Secretary, Standards and Practices Board, ISA, 67 Alexander Drive, P. O. Box 12277, Research Triangle Park, NC 27709, Telephone (919) 990-9227, Fax (919) 549-8288, e-mail: standards@isa.org.

The ISA Standards and Practices Department is aware of the growing need for attention to the metric system of units in general, and the International System of Units (SI) in particular, in the preparation of instrumentation standards. The Department is further aware of the benefits to U.S.A. users of ISA standards of incorporating suitable references to the SI (and the metric system) in their business and professional dealings with other countries. Toward this end, this Department will endeavor to introduce SI-acceptable metric units in all new and revised standards to the greatest extent possible. *The Metric Practice Guide*, which has been published by the Institute of Electrical and Electronics Engineers as ANSI/IEEE Std. 268-1992, and future revisions, will be the reference guide for definitions, symbols, abbreviations, and conversion factors.

It is the policy of the ISA to encourage and welcome the participation of all concerned individuals and interests in the development of ISA standards. Participation in the ISA standards-making process by an individual in no way constitutes endorsement by the employer of that individual, of the ISA, or of any of the standards that ISA develops.

The information contained in the preface, footnotes, and appendices is included for information only and is not a part of the standard.

The following people served as members of ISA Subcommittee SP75.08:

NAME	COMPANY
W. Weidman, Chairman	Gilbert Commonwealth, Inc.
H. Baumann	H. D. Baumann & Associates, Ltd.
G. Borden, Jr.	Consultant
R. Brodin	Fisher Controls International, Inc.
F. Cain	Valtek, Inc.
R. Chown	OTEC
J. Emery	Honeywell, Inc.
B. Hart	M. W. Kellogg Company
H. Illing	DeZurik Valve Company
C. Koloboff	Chevron Research & Technology Company
J. Leist	Dow Chemical U.S.A.
J. Reed	Norriseal Controls
H. Schwartz	Flexible Valve Corporation

This is a preview of "ANSI/ISA S75.16-1994". [Click here to purchase the full version from the ANSI store.](#)

1 Scope

1.1 This standard applies to flanged control valves, sizes 15 mm (1/2 inch) through 450 mm (18 inches), having top, top and bottom, port, or cage guiding.

2 Purpose

2.1 The purpose of this standard is to aid users in their piping design by providing ANSI Classes 900, 1500, and 2500, raised-face, flanged control valve dimensions, without giving special consideration to the equipment manufacturer to be used.

2.2 The short-long dimensions provided in [Table 1](#) clarify [Section 2.1](#) by consolidating the diversity of existing manufacturers' lengths into two sets of dimensions for each valve size. Before using either the short or long dimension, the piping designer should confirm with the selected valve manufacturer which dimension is correct for the valve(s) being supplied.

3 Definitions

3.1 For definitions of terms used in this standard, see ANSI/ISA-S75.05, "Control Valve Terminology."

4 Bibliography

The following references are included for the definition of pressure classes, flange dimensions, material identification, and cross-reference information. They were developed by the American Society of Mechanical Engineers (ASME).

4.1 American National Standards Institute, Inc. (ANSI), Standard ANSI/ASME B16.34-1988, "Valves — Flanged, Threaded, and Welding End."

4.2 American National Standards Institute, Inc., Standard ANSI/ASME B16.5-1988, "Pipe Flanges and Flanged Fittings."

4.3 American National Standards Institute, Inc., Standard ANSI/ASME B16.10-1986, "Face-to-Face and End-to-End Dimensions of Valves."
