American National Standard

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether they have approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no persons shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Foreword [This Foreword is not part of American National Standard ANSI/ISEA 101-1996 (R2008)]

The standard is a revision of *American National Standard for Limited-Use and Disposable Coveralls -- Size and Labeling Requirements*, ANSI/ISEA 101-1993.

The purpose of this standard is to provide requirements for the performance, finished dimensions, labeling and packaging of limited-use and disposable coveralls.

Changes in this edition include the omission of maximum dimensions and the inclusion of a dynamic fit-test protocol. A wear test report has also been added as Appendix A.

This standard was drafted by the Protective Apparel Group of the International Safety Equipment Association. It was processed and approved for submittal to ANSI by the canvass method. The following organizations recognized as having an interest in the standardization of sizes and labeling for limited-use and disposable coveralls were contacted prior to the approval of this standard. Inclusion in this list does not necessarily imply that the organization concurred with the submittal of the proposed standard to ANSI.

Suggestions for the improvement of this standard are welcome. They should be sent to the ISEA, 1901 N. Moore Street, Suite 808, Arlington, VA 22209 or isea@safetysafetyequipment.org.

This standard was processed and approved for submittal to ANSI by the Canvass Method. The following organizations were contacted prior to the approval of this standard. Inclusion in this list does not necessarily imply that the organization concurred with the submittal of the proposed standard to ANSI.
