Foreword	iv
1 Scope	1
2 Normative references	1
3 Principle	1
3.1 Method 1 (Long iodide method).....	1
3.2 Method 2 (Short iodide method).....	1
4 Reagents	1
5 Apparatus	3
6 Sample	4
6.1 Test sample.....	4
6.2 Test portion.....	4
7 Procedure	4
7.1 Number of determinations.....	4
7.2 Blank test.....	4
7.3 Determination — method 1: Long iodide method.....	5
7.3.1 Decomposition of test portion.....	5
7.3.2 Separation of copper.....	5
7.3.3 Dissolution of copper precipitate.....	5
7.3.4 Titration.....	6
7.3.5 FAAS determination of copper in the insoluble residue, filtrate, and filter paper..	6
7.4 Determination — method 2: Short iodide method.....	7
7.4.1 Decomposition of the test portion.....	7
7.4.2 Titration.....	7
8 Expression of results	8
9 Precision	8
9.1 Expression of precision.....	8
9.2 Method for obtaining the final result (see Annex B).....	9
9.3 Precision between laboratories.....	9
9.4 Check of trueness.....	10
10 Test report	11
Annex A (normative) Procedure for the preparation and determination of the mass of a predried test portion	12
Annex B (informative) Flowsheet of the procedure for the acceptance of analytical values for test samples	14
Annex C (informative) Derivation of precision formulae	15
Bibliography	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 183, *Copper, lead, zinc and nickel ores and concentrates*.

This second edition cancels and replaces the first edition (ISO 10258:1994), of which the warning in [A.3.1](#) in [Annex A](#) has been revised.
