## Contents

	Page
Foreword.....	iv
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 Running and pulling casing.....	2
4.1 Preparation and inspection before running.....	2
4.2 Drifting of casing .....	3
4.3 Stabbing, making up and lowering .....	3
4.4 Field makeup .....	4
4.5 Casing landing procedure .....	6
4.6 Care of casing in hole .....	6
4.7 Recovery of casing.....	6
4.8 Causes of casing trouble .....	7
5 Running and pulling tubing.....	9
5.1 Preparation and inspection before running.....	9
5.2 Stabbing, making up and lowering .....	11
5.3 Field makeup.....	11
5.4 Pulling tubing.....	12
5.5 Causes of tubing trouble .....	13
6 Transportation, handling and storage.....	14
6.1 Transportation.....	15
6.2 Handling.....	15
6.3 Storage.....	16
7 Inspection and classification of used casing and tubing.....	16
7.1 General.....	16
7.2 Inspection and classification procedures.....	16
7.3 Pipe wall and threaded-joint conditions.....	17
7.4 Service rating .....	18
8 Reconditioning.....	18
9 Field welding of attachments on casing .....	18
9.1 General.....	18
9.2 Requirements for welds .....	19
9.3 Processes .....	19
9.4 Filler for arc welding.....	19
9.5 Preparation of base metal.....	19
9.6 Preheating and cooling .....	19
9.7 Welding technique .....	20
Annex A (informative) SI units .....	39

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 10405 was prepared by Technical Committee ISO/TC 67, *Materials, equipment and offshore structures for petroleum and natural gas industries*, Subcommittee SC 5, *Casing, tubing and drill pipe*.

This second edition cancels and replaces the first edition (ISO 10405:1993), which has been technically revised.

Annex A of this International Standard is for information only.
