Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification	3
5 Requirements	3
5.1 General	3
5.2 Depth of cure	4
5.2.1 General	4
5.2.2 Depth of cure (only type 2 class 2 materials)	4
5.3 Surface finish	4
5.4 Flexural strength	4
5.5 Bond strength	5
5.5.1 Special bonding system without macromechanical retention	5
5.5.2 Values higher than 5 MPa	5
5.6 Water sorption	5
5.7 Solubility	5
5.8 Shade consistency	5
5.9 Colour stability	6
6 Sampling	6
6.1 For all tests	6
6.2 For test of shade consistency	6
6.3 For test of colour stability	6
7 Measurement and test methods	6
7.1 General	6
7.1.1 Ambient test conditions	6
7.1.2 Water	6
7.1.3 Preparation of test specimens	6
7.2 Visual inspection	7
7.3 Depth of cure (only for type 2, class 2 if not opaque resin)	7
7.3.1 Apparatus	7
7.3.2 Materials	8
7.3.3 Procedure and specimen preparation	9
7.3.4 Expression of results	9
7.4 Surface finish	9
7.4.1 Apparatus (for type 2 class 3 and type 4 materials)	9
7.4.2 Materials	9
7.4.3 Specimen preparation	9
7.4.4 Surface polishing	10
7.5 Flexural strength	10
7.5.1 Apparatus	10
7.5.2 Materials	11
7.5.3 Preparation of test specimens	11
7.5.4 Procedure	12
7.5.5 Expression of results	13
7.6 Bond strength (only type 1, type 2 classes 1 and 2 and type 3 materials)	13
7.6.1 Apparatus	13
7.6.2 Materials	14
7.6.3 Preparation of test specimens	15
7.6.4 Procedure	15
7.6.5 Expression of results	15

	7.7.2	Materials.....	16
	7.7.3	Preparation of test specimen.....	17
	7.7.4	Procedure.....	17
	7.7.5	Expression of results.....	18
7.8		Shade consistency and colour stability.....	19
	7.8.1	General.....	19
	7.8.2	Apparatus.....	19
	7.8.3	Materials.....	19
	7.8.4	Preparation of test specimens.....	20
	7.8.5	Procedure.....	20
	7.8.6	Colour comparison.....	21
	7.8.7	Expression of results for shade consistency.....	21
	7.8.8	Expression of results for colour stability.....	21
8		Packaging and labelling.....	21
	8.1	Packaging.....	21
	8.2	Labelling and instructions for use.....	21
		Bibliography.....	25

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO [had/had not] received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 106, *Dentistry*, Subcommittee SC 2, *Prosthetic materials*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 55, *Dentistry*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fifth edition cancels and replaces the fourth edition (ISO 10477:2020), which has been technically revised.

The main changes are as follows:

- materials for additive manufacturing have been added to [Clause 4](#) as type 2 class 3;
- materials for subtractive manufacturing have been added to [Clause 4](#) as type 4;
- editorial updates have been made.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
