Foreword	iv
1 Scope	1
2 Normative references	1
3 Principle	1
4 Terms and definitions	1
5 Materials and apparatus	2
5.1 Reference materials	2
5.2 Laboratory exposure devices	3
6 Preparation of test specimens	5
7 Exposure conditions	6
8 Procedure	6
8.1 Apparatus set-up	6
8.2 Adjustment of the effective humidity (see Clause 7 and Annex E)	7
8.3 Exposure methods	8
9 Assessment of colour fastness	15
10 Test report	16
Annex A (normative) Requirements for xenon arc exposure devices	19
Annex B (normative) Procedures for measuring the irradiance uniformity in the specimen exposure area (for apparatus manufacturers only)	22
Annex C (informative) Light exposure equivalents for blue wool lightfastness references L2 to L9	24
Annex D (informative) General Information on colour fastness to Light	25
Annex E (informative) Guidelines for Conducting Testing	27
Bibliography	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 105-B02 was prepared by Technical Committee ISO/TC 38, *Textiles*, Subcommittee SC 1, *Tests for coloured textiles and colorants*.

This fifth edition cancels and replaces the fourth edition (ISO 105-B02:1994), which has been technically revised. It also incorporates ISO 105-B02:1994/Amd 1:1998 and ISO 105-B02:1994/Amd 2:2000.

ISO 105 was previously published in 13 "parts", each designated by a letter (e.g. "Part A"), with publication dates between 1978 and 1985. Each part contained a series of sections", each designated by the respective part letter and by a two-digit serial number (e.g. "Section A01"). These sections are now being republished as separate documents, themselves designated "parts" but retaining their alpha-numeric designations. A complete list of these parts is given in ISO 105-A01.
