Second edition
2016-05-01

Corrected version
2016-08-15

Resistance welding equipment — Transformers — Integrated transformers for welding guns

*Matériel de soudage par résistance — Transformateurs —
Transformateurs incorporés pour pinces à souder*

Reference number
ISO 10656:2016(E)

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Dimensions and characteristics of transformers	1
4 Additional equipment	6
4.1 Grounding provision	6
4.2 Thermal protection	6
4.3 Output current sensing coil	6
5 Marking	7
5.1 General	7
5.2 Rating plate	7
5.3 Colour of exterior finish	7
6 Designation	8
7 Test conditions	8
7.1 Type tests	8
7.1.1 Mechanical strength	8
7.1.2 Dynamic behaviour of the output terminals	8
7.2 Thermal test (type test)	9
Annex A (informative) Secondary current and duty cycle	10
Bibliography	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 44, *Welding and allied processes*, Subcommittee SC 6, *Resistance Welding and allied mechanical joining*.

This second edition cancels and replaces the first edition (ISO 10656:1996), which has been technically revised. It also incorporates the Technical Corrigendum ISO 10656:1996/Cor. 1:2000.

This corrected version of ISO 10656:2016 incorporates the following corrections:

- the example of a designation in [Clause 6](#) has been dated with the year of publication;
- a key has been added to [Figure A.1](#).

Requests for official interpretations of any aspect of this International Standard should be directed to the Secretariat of ISO/TC 44/SC 6 via your national standards body. A complete listing of these bodies can be found at www.iso.org.
