## Contents

	Page
Foreword .....	iv
<b>1 Scope .....</b>	<b>1</b>
<b>2 Normative references .....</b>	<b>1</b>
<b>3 Terms and definitions .....</b>	<b>1</b>
<b>4 General characteristics of the coating .....</b>	<b>2</b>
4.1 Zinc flake coating systems .....	2
4.2 Composition of the systems .....	2
4.3 Mechanical and physical properties and curing .....	2
4.4 Avoidance of internal hydrogen embrittlement .....	3
4.5 Coating systems and coating processes .....	3
<b>5 Corrosion protection and testing .....</b>	<b>3</b>
5.1 General .....	3
5.2 Neutral salt spray test .....	3
5.3 Sulfur dioxide test (Kesternich test) .....	4
5.4 Bulk handling, automatic processes such as feeding and/or sorting, storage and transport .....	4
<b>6 Dimensional requirements and testing .....</b>	<b>4</b>
6.1 General .....	4
6.2 Fasteners with ISO metric thread .....	4
6.2.1 Coating thickness .....	4
6.2.2 Gaugeability and assemblability .....	5
6.3 Other fasteners .....	6
<b>7 Mechanical and physical properties and testing .....</b>	<b>6</b>
7.1 Appearance .....	6
7.2 Corrosion resistance related to temperature .....	6
7.3 Test methods for thickness or coating weight determination .....	6
7.4 Ductility .....	7
7.5 Adhesion/cohesion .....	8
7.6 Sacrificial cathodic protection .....	8
7.7 Torque/clamp force relationship .....	8
7.8 Determination of hexavalent chromium .....	8
<b>8 Applicability of tests .....</b>	<b>8</b>
8.1 General .....	8
8.2 Tests mandatory for each lot .....	8
8.3 Tests for in-process control .....	9
8.4 Tests to be performed when specified by the purchaser .....	9
<b>9 Designation .....</b>	<b>9</b>
9.1 Designation of zinc flake coating systems for the order .....	9
9.2 Designation of zinc flake coating systems for labelling .....	10
<b>10 Ordering requirements .....</b>	<b>10</b>
<b>Annex A (informative) Design aspects and assembly of coated fasteners .....</b>	<b>12</b>
<b>Annex B (informative) Coating thickness and thread clearance for ISO metric screw threads .....</b>	<b>16</b>
<b>Annex C (informative) Coating systems tested in accordance with ISO 9227, NSS —     Evaluation of cabinet corrosivity for the neutral salt spray test .....</b>	<b>23</b>
<b>Bibliography .....</b>	<b>31</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 2, *Fasteners*, SC 14, *Surface coatings*.

This third edition cancels and replaces the second edition (ISO 10683:2014), which has been technically revised. The main changes compared to the previous edition are as follows:

- the normative references have been updated;
- the restriction of gauging to external threads in the 2<sup>nd</sup> paragraph of [6.2.2](#) has been removed;
- the last column in Table B.2 with maximum clearance for tolerance position e has been removed;
- [Annex C](#) has been revised completely.
