## **Non-destructive testing of welds — Ultrasonic testing — Use of time-of-flight diffraction technique (TOFD)**

*Contrôle non destructif des assemblages soudés — Contrôle par  
ultrasons — Utilisation de la technique de diffraction des temps de vol  
(méthode TOFD)*

Foreword .....	iv
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
4 General remarks on the capabilities of the technique.....	2
5 Testing levels.....	3
6 Information required prior to testing.....	3
6.1 Items to be defined by specification .....	3
6.2 Specific information required by the operator before testing .....	4
6.3 Written test instruction or procedure.....	4
7 Requirements for personnel and equipment.....	4
7.1 Personnel qualifications.....	4
7.2 Equipment .....	5
8 Preparation for testing.....	5
8.1 Volume to be inspected .....	5
8.2 Setup of probes .....	6
8.3 Scan increment setting.....	6
8.4 Geometry considerations .....	6
8.5 Preparation of scanning surfaces .....	6
8.6 Temperature.....	7
8.7 Couplant .....	7
8.8 Provision of datum points .....	7
9 Testing of base material .....	7
10 Range and sensitivity settings.....	8
10.1 Settings.....	8
10.2 Checking of the settings.....	8
10.3 Reference blocks.....	9
11 Weld testing .....	10
12 Interpretation and analysis of TOFD images .....	10
12.1 General .....	10
12.2 Assessing the quality of the TOFD image .....	10
12.3 Identification of relevant TOFD indications .....	11
12.4 Classification of relevant TOFD indications .....	11
12.5 Determination of location and size.....	12
12.6 Evaluation against acceptance criteria.....	13
13 Test report.....	13
Annex A (informative) Reference blocks .....	15
Annex B (informative) Examples of TOFD scans .....	20
Bibliography.....	30

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 10863 was prepared by the European Committee for Standardization (CEN) Technical Committee CEN/TC 121, *Welding*, in collaboration with Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 5, *Testing and inspection of welds*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Requests for official interpretations of any aspect of this International Standard should be directed to the Secretariat of ISO/TC 44/SC 5 via your national standards body. A complete listing of these bodies can be found at [www.iso.org](http://www.iso.org).
