<b>Foreword</b> .....	<b>vi</b>
<b>Introduction</b> .....	<b>vii</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>2</b>
<b>3 Terms and definitions</b> .....	<b>3</b>
<b>4 Safety requirements and/or protective/risk reduction measures</b> .....	<b>8</b>
4.1 General .....	8
4.1.1 General .....	8
4.1.2 Sharp edges and acute angles .....	8
4.1.3 Stored energy components .....	8
4.2 Starting/moving and stopping .....	8
4.2.1 Unauthorized starting .....	8
4.2.2 Stopping system .....	8
4.2.3 Unintended movement .....	8
4.2.4 Uncontrolled motion .....	9
4.2.5 Powered travel movement .....	9
4.2.6 Non-activation of the parking brake .....	9
4.2.7 Brakes .....	9
4.3 Electrical and electronic systems .....	9
4.3.1 General .....	9
4.3.2 Degree of protection .....	10
4.3.3 Electrical connections .....	10
4.3.4 Batteries .....	11
4.4 Controls .....	11
4.4.1 General .....	11
4.4.2 Multiple operating positions .....	13
4.4.3 Controls of trucks accessible from ground level .....	13
4.4.4 Inadvertent activation .....	13
4.4.5 Travel controls .....	13
4.4.6 Differential locking .....	15
4.4.7 Steering controls .....	15
4.4.8 Load-handling controls .....	16
4.4.9 Multi-function controls .....	17
4.4.10 Stabilizing device control .....	17
4.4.11 Sway/levelling control .....	17
4.4.12 Axle oscillation locking-mechanism control .....	17
4.4.13 Hand throttle control .....	17
4.5 Power systems and accessories .....	17
4.5.1 Exhaust systems .....	17
4.5.2 Cooling systems .....	18
4.5.3 Tanks and pressure vessels .....	18
4.6 Stabilizing devices .....	18
4.7 Design requirements for maintenance purposes .....	19
4.7.1 General .....	19
4.7.2 Tilttable cab support device .....	19
4.8 Systems for lifting, tilting and reaching .....	19
4.8.1 Chains and wire ropes .....	19
4.8.2 Hydraulic system .....	20
4.8.3 Maximum load-lowering speed .....	21
4.8.4 Limitation of stroke .....	21
4.8.5 Fork arms, attachments and attachment brackets .....	21
4.9 Operator's station .....	21
4.9.1 General requirements .....	21

4.9.2	Storage of operator's manual.....	21
4.9.3	Hot parts.....	21
4.9.4	Pipes and hoses.....	22
4.9.5	Operator's station equipped with enclosed cab.....	22
4.9.6	Operator's seat.....	24
4.9.7	Control panels and symbols on displays.....	25
4.9.8	Other indicating devices.....	25
4.10	Operator access.....	25
4.10.1	General requirements.....	25
4.10.2	Enclosed cab openings.....	25
4.11	Protective measures and devices.....	26
4.11.1	Hot parts.....	26
4.11.2	Protection against crushing, shearing and trapping.....	26
4.11.3	Guards.....	26
4.11.4	Engine compartment.....	26
4.11.5	Fenders.....	27
4.11.6	Roll-over protective structures (ROPS) and falling object protective structures (FOPS).....	27
4.11.7	Elevating and/or tiltable operator's station.....	27
4.11.8	Audible warning devices.....	27
4.12	Stability.....	27
4.12.1	Stability tests on tilting platform.....	27
4.12.2	Longitudinal load moment control.....	27
4.13	Visibility.....	27
4.14	External lighting devices.....	27
4.15	Fire protection.....	28
4.15.1	Fire resistance.....	28
4.15.2	Fire extinguisher.....	28
4.16	Retrieval, transportation, lifting and towing.....	28
4.16.1	General.....	28
4.16.2	Retrieval.....	28
4.16.3	Tie-down.....	28
4.16.4	Lifting.....	28
4.16.5	Towing.....	28
4.17	Noise.....	28
4.18	Electromagnetic compatibility.....	29
<b>5</b>	<b>Verification of requirements and safety measures.....</b>	<b>29</b>
5.1	General.....	29
5.2	Functional verification.....	29
5.3	Structural verification.....	29
5.3.1	Test loads.....	29
5.3.2	Static test.....	29
5.3.3	Dynamic testing.....	30
5.4	Load holding verification.....	30
5.5	Maximum load lowering speed.....	30
<b>6</b>	<b>Information for use.....</b>	<b>31</b>
6.1	Instruction handbook.....	31
6.1.1	General.....	31
6.1.2	Operating and maintenance instructions.....	31
6.1.3	Instructions regarding the truck.....	32
6.1.4	Instructions regarding the operational use of the truck.....	32
6.1.5	Instructions regarding internal combustion engine trucks.....	33
6.1.6	Instructions regarding transportation and storage of trucks.....	33
6.1.7	Instructions regarding inspection and routine maintenance.....	33
6.2	Graphical symbols and warnings.....	34
6.2.1	Safety signs and graphical symbols.....	34
6.2.2	Graphical symbols lift point.....	34

6.2.3	Graphical symbols tie-down point .....	34
6.2.4	Graphical symbols of retrieval point .....	34
6.2.5	Graphical symbols for pneumatic tyre inflation pressures .....	35
6.2.6	Graphical symbol for fuel filling points .....	35
6.2.7	Graphical symbol for hydraulic fluid filling points .....	35
6.2.8	Graphical symbol for stored energy components .....	36
6.2.9	Graphical symbol for brake fluid filling points .....	36
6.2.10	Graphical symbol for battery disconnection .....	36
6.2.11	Warnings .....	36
6.3	Marking .....	37
6.3.1	Manufacturer plate(s) .....	37
6.4	Load charts .....	37
6.4.1	Trucks with load-carrying attachments .....	37
6.4.2	Trucks with non-load-carrying attachments .....	38
<b>Annex A (informative) List of significant hazards .....</b>		<b>39</b>
<b>Annex B (normative) Attachments and attachment brackets .....</b>		<b>43</b>
<b>Annex C (normative) Elevating operator's stations .....</b>		<b>46</b>
<b>Bibliography .....</b>		<b>48</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

This document was prepared by Technical Committee ISO/TC 110, *Industrial trucks*, Subcommittee SC 4, *Rough-terrain trucks*.

This second edition cancels and replaces the first edition (ISO 10896-1:2012), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the document has been aligned with regional standards;
- a new steering test has been added;
- new requirements for the hydraulic circuit have been introduced.

A list of all parts in the ISO 10896 series can be found on the ISO website.

## Introduction

This document is a type-C standard as stated in ISO 12100.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organisations, market surveillance etc.)

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e. g. for maintenance (small, medium and large enterprises);
- consumers (in case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate at the drafting process of this document.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

This document has been developed in order to align as far as possible its requirements to those of the applicable regional standards in Australia, EU, USA.
