<b>Foreword .....</b>	iv
<b>1 Scope.....</b>	1
<b>2 Normative references.....</b>	1
<b>3 Terms and definitions .....</b>	1
<b>4 Requirements.....</b>	2
<b>4.1 General .....</b>	2
<b>4.2 Material of construction.....</b>	2
<b>4.3 Straps and their fixation points .....</b>	2
<b>4.4 Spray tank .....</b>	2
<b>4.5 Strainers and filters.....</b>	3
<b>4.6 Nozzles .....</b>	3
<b>4.7 Air hoses and chemicals hoses .....</b>	3
<b>5 Tests .....</b>	3
<b>5.1 Test liquids and equipment.....</b>	3
<b>5.2 Test conditions .....</b>	4
<b>5.3 Liquid flow rate .....</b>	5
<b>5.4 Volume of total residual liquid .....</b>	5
<b>5.5 Stability.....</b>	5
<b>5.6 Contents gauge scale and total tank volume .....</b>	5
<b>5.7 Filling .....</b>	6
<b>5.8 Air velocity and air volume.....</b>	6
<b>5.9 Droplet size .....</b>	7
<b>5.10 Potential ground deposit .....</b>	8
<b>5.11 Potential vertical deposit .....</b>	8
<b>5.12 Test for compatibility of sprayer components .....</b>	8
<b>6 Specifications and performance limits .....</b>	9
<b>6.1 Volume of residual liquid.....</b>	9
<b>6.2 Stability.....</b>	9
<b>6.3 Contents gauge scale and total tank volume .....</b>	9
<b>6.4 Filling .....</b>	9
<b>6.5 Liquid flow rate .....</b>	9
<b>6.6 Emptying .....</b>	9
<b>6.7 Compatibility of sprayer components.....</b>	10
<b>7 Instruction handbook.....</b>	10
<b>8 Test report.....</b>	10
<b>Annex A (informative) Sprayer locking device.....</b>	11
<b>Annex B (informative) Device for detecting potential vertical deposits.....</b>	12
<b>Annex C (normative) Stability test .....</b>	13
<b>Annex D (normative) Sampling grid position for air velocity determination.....</b>	14
<b>Annex E (informative) Position of sprayer and Petri dishes for potential ground deposit determination.....</b>	15
<b>Annex F (informative) Example test report.....</b>	16
<b>Bibliography.....</b>	19

## **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 10988 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 6, *Equipment for crop protection*.
