First edition
1998-05-01

Sterile single-use intravascular catheter introducers

Introduceurs de cathéters intravasculaires stériles, non réutilisables

Reference number
ISO 11070:1998(E)

Contents		Page
1	Scope	1
2	Normative references	1
3	Definitions	1
4	General requirements	4
5	Additional requirements for introducer needles	5
6	Additional requirements for introducer catheters	6
7	Additional requirements for sheath introducers	7
8	Additional requirements for guide wires	8
9	Additional requirements for dilators	9
10	Additional requirements for kits containing combinations of devices specified in this International Standard	10
 Annexes		
A	Guidance on materials and design	11
B	Test for corrosion resistance	12
C	Determination of force at break of introducer catheters, sheath introducers and dilators	13
D	Test for liquid leakage from sheath introducers under pressure	14
E	Test for liquid leakage through haemostasis valves of sheath introducers	16
F	Test for fracture of guide wires	17
G	Test for resistance of guide wires to damage by flexing	19
H	Test for strength of union of core wire and coil of guide wire and union of coil and safety wire	21
J	Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 11070 was prepared by Technical Committee ISO/TC 84, *Medical devices for injection*, Subcommittee SC 1, *Syringes, needles and intravascular catheters for single use*.

Annexes B, C, D, E, F, G, and H form an integral part of this International Standard. Annexes A and J are for information only.
