Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Experimental conditions	4
6 Qualification of assessors	4
7 Procedure	4
7.1 Monitoring via formal performance validation	4
7.2 Statistical analysis of data from formal performance validation (a single session)	5
7.3 Overall panel performance from formal performance validation	6
7.4 Individual assessor performance from formal performance validation	7
7.5 Performance issues	9
7.6 Monitoring via routine product profiling	9
7.7 Experimental design for study of performance over time	9
7.8 Statistical analysis of data over time	9
7.9 Reproducibility between panels	10
7.10 Statistical analysis of complete profiles	10
Annex A (informative) Example of practical application	11
Annex B (informative) Example of use of cusum analysis	18
Annex C (informative) Example of use of Shewhart chart	21
Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11132 was prepared by Technical Committee ISO/TC 34, *Food products*, Subcommittee SC 12, *Sensory analysis*.
