Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	1
4 Measurement accuracy	4
4.1 Flow rate	4
4.2 Pressure.....	4
4.3 Temperature	4
4.4 Relative humidity	4
4.5 Challenge gas.....	4
5 General conditions	4
5.1 Conditioning of challenge gas	4
5.2 Cleanliness of influent air	4
5.3 Challenge gas concentration stability	4
6 Test contaminants	5
6.1 Mandatory contaminants	5
6.2 Optional contaminants	5
6.3 Other contaminants	5
7 Test equipment	6
7.1 General layout.....	6
7.2 Test stand performance	6
7.3 Air supply	6
7.4 Test duct.....	6
7.5 Contaminant generation and supply	6
7.6 Sampling and analysis of challenge gas.....	7
7.7 Test equipment constituents	7
8 Experimental determination of t_0, using t_{lag}.....	8
9 Preparation of filter/filter element for testing	8
10 Test methods.....	8
10.1 Purpose.....	8
10.2 Air pressure loss.....	8
10.3 Preparation of challenge gases.....	9
10.4 Determination of efficiency/breakthrough	9
10.5 Determination of capacity.....	9
10.6 Data and analysis.....	9
10.7 Determination of desorption (optional)	10
11 System validation	10
11.1 Air flow uniformity	10
11.2 Verification challenge gas stability (without test filter)	10
12 Test report	11
Annex A (normative) Test stand configuration	12
Annex B (normative) Detailed definition and calculation of t_0 and t_{lag}.....	13
Annex C (normative) Capacity determination	15
Annex D (informative) Conversion of test contaminant concentration units	16
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11155-2 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 7, *Injection equipment and filters for use on road vehicles*.

This first edition of ISO 11155-2 cancels and replaces the ISO/TS 11155-2:2002, which has been technically revised.

ISO 11155 consists of the following parts, under the general title *Road vehicles — Air filters for passenger compartments*:

- *Part 1: Test for particulate filtration* [Technical Specification]
- *Part 2: Test for gaseous filtration*
