

Fourth edition
2022-05

Road vehicles — Vehicle test methods for electrical disturbances from narrowband radiated electromagnetic energy —

Part 4: Harness excitation methods

*Véhicules routiers — Méthodes d'essai d'un véhicule soumis
à des perturbations électriques par rayonnement d'énergie
électromagnétique en bande étroite —*

Partie 4: Méthodes d'excitation des faisceaux

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test conditions	1
5 Test location	2
6 Test instrumentation	2
6.1 BCI test method	2
6.1.1 General	2
6.1.2 Injection probe	3
6.1.3 Current measurement probe	3
6.1.4 Stimulation and monitoring of the DUT	3
6.2 TWC test method	3
6.2.1 General	3
6.2.2 Tubular wave coupler	4
6.2.3 50 Ω load resistor	4
6.2.4 Stimulation and monitoring of the DUT	4
7 Test set-up	4
7.1 BCI Test methods	4
7.1.1 Substitution method	4
7.1.2 Closed-loop method with power limitation	5
7.2 TWC Test methods	6
8 Test procedure	7
8.1 General	7
8.2 Test plan	7
8.3 Test methods	8
8.3.1 BCI test method	8
8.3.2 Tubular wave coupler test method	10
8.4 Test report	11
Annex A (normative) Calibration configuration (current injection probe calibration)	13
Annex B (informative) Test set-up transfer impedance	15
Annex C (informative) Function performance status classification (FPSC)	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 32, *Electrical and electronic components and general system aspects*.

This fourth edition cancels and replaces the third edition (ISO 11451-4:2013), which has been technically revised.

The main changes are as follows:

- extension of BCI frequency range,
- addition of TWC test method,
- update of test plan and test report requirements,
- update of [Annexes A, B and C](#) for consistency with ISO 11452-4:2020.

A list of all parts in the ISO 11451 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
