

Second edition
2004-08-01

Water quality — Determination of the elimination and biodegradability of organic compounds in an aqueous medium — Activated sludge simulation test

Qualité de l'eau — Détermination de l'élimination et de la biodégradabilité des composés organiques en milieu aqueux — Essai de simulation des boues activées

Reference number
ISO 11733:2004(E)

Foreword.....	iv
1 Scope.....	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	3
5 Test environment	4
6 Reagents	4
7 Apparatus.....	7
8 Procedure.....	8
8.1 General	8
8.2 Preparation of the inoculum	8
8.3 Performance of the test.....	8
9 Calculation and expression of results	11
9.1 Calculation of the degree of elimination.....	11
9.2 Expression of results.....	12
9.3 Indication of biodegradation.....	12
9.4 Biodegradation of the organic medium	12
10 Validity of the test	12
11 Test report.....	13
Annex A (informative) Modification of the activated sludge simulation test for nitrifying-denitrifying sewage treatment plants	14
Annex B (informative) Coupling of the test units (optional)	18
Annex C (informative) Test systems.....	19
Annex D (informative) Effects of sludge retention time on effluent concentration	22
Annex E (informative) Example of an elimination/degradation curve.....	25
Bibliography	26

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11733 was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 5, *Biological methods*.

This second edition cancels and replaces the first edition (ISO 11733:1995), which has been technically revised.
