Third edition
2019-04

Tractors and machinery for agriculture and forestry — Serial control and communications data network —

Part 2: Physical layer

*Tracteurs et matériels agricoles et forestiers — Réseaux de
commande et de communication de données en série —*

Partie 2: Couche physique

Reference number

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 General requirements	2
5.1 Network physical layer.....	2
5.2 Physical media.....	2
5.3 Differential voltage.....	3
5.4 Bus.....	3
5.4.1 Levels.....	3
5.4.2 Voltage range.....	3
5.4.3 Bus termination.....	3
5.5 Resistance and capacitance.....	6
5.5.1 Internal resistance (R_{in}), capacitance (C_{in}).....	6
5.5.2 Differential internal resistance (R_{diff}), capacitance (C_{diff}).....	6
5.5.3 Weak termination for stubs.....	7
5.6 Bit time.....	7
5.7 AC parameters.....	7
6 Bus segment specifications	8
6.1 Twisted quad bus segment.....	8
6.2 TPPL bus segment.....	9
7 Electrical specifications	9
7.1 Electrical data.....	9
7.1.1 General.....	9
7.1.2 Absolute maximum ratings.....	9
7.1.3 DC parameters.....	9
7.1.4 Bus voltages (operational).....	13
7.1.5 Electrostatic discharge (ESD).....	13
7.2 Physical media parameters.....	14
7.2.1 Unshielded twisted quad cable.....	14
7.2.2 Unshielded twisted pair.....	15
7.3 Topology of twisted quad physical layers.....	16
7.3.1 ECU connection to TBC_PWR and TBC_RTN.....	17
7.3.2 Power for TBC_PWR and TBC_RTN.....	18
7.4 Topology of twisted pair physical layer.....	18
7.4.1 General.....	18
7.4.2 Simple stub.....	18
7.4.3 Compound stub.....	19
7.4.4 Multiple splice.....	19
7.5 TBC parameters.....	20
7.6 Connectors.....	21
7.6.1 General.....	21
7.6.2 Bus extension connector.....	23
7.6.3 Implement bus breakaway connector.....	25
7.6.4 In-cab connector.....	34
7.6.5 Diagnostic connector.....	38
8 Conformance tests	43
8.1 General requirements.....	43
8.2 Internal resistance.....	44

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. The different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 19, *Agricultural electronics*.

This third edition cancels and replaces the second edition (ISO 11783-2:2012), which has been technically revised. It also incorporates the Technical Corrigendum ISO 11783-2:2012/Cor 1:2012. The main changes compared to the previous edition are as follows:

- inclusion of physical layer aspects previously listed in other documents of the ISO 11783 series;
- addition of a twisted pair physical layer;
- updates to parameters of the physical layer components to reflect the current state of art;
- updates to test criteria to verify the conformance of implementations to this document.

A list of all the parts in the ISO 11783 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

ISO 11783-1 to ISO 11783-14 specify a communications system for agricultural equipment based on the ISO 11898^[1] protocol. SAE J1939 documents, on which parts of ISO 11783 are based, were developed jointly for use in truck and bus applications and for construction and agricultural applications. Joint documents were completed to allow electronic units that meet the truck and bus SAE J1939 specifications to be used by agricultural and forestry equipment with minimal changes. General information on the ISO 11783 series is to be found in ISO 11783-1.
