

ISO 11999-4

PPE for firefighters — Test methods and requirements for PPE used by firefighters who are at risk of exposure to high levels of heat and/or flame while fighting fires occurring in structures —

Part 4:
Gloves

**Second edition
2024-08**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Glove design requirements	2
4.1 General.....	2
4.2 Glove body length.....	2
4.3 Wristlet or cuff.....	3
4.4 Glove sizing.....	3
4.4.1 Minimum sizing.....	3
4.4.2 Hand dimensions.....	3
4.4.3 Innocuousness.....	4
4.4.4 Other design requirements.....	4
5 Glove sampling, testing, and pretreatment	4
5.1 General.....	4
5.2 Sampling levels for testing.....	4
5.3 Sampling level for determining design compliance.....	4
5.4 Testing.....	4
5.5 Pre-treatments.....	5
5.5.1 Pre-treatment by laundering or dry cleaning.....	5
5.5.2 Dry conditioning.....	5
5.5.3 Wet conditioning.....	5
6 Glove performance requirements	6
7 Glove thermal performance requirements	7
7.1 General.....	7
7.2 Flame resistance.....	7
7.3 Heat transfer (flame exposure).....	8
7.4 Heat transfer (radiant exposure).....	8
7.5 Heat transfer (conductive exposure).....	9
7.6 Heat resistance.....	9
7.7 Thread heat resistance.....	9
8 Glove mechanical performance requirements	10
8.1 Abrasion resistance.....	10
8.2 Cut resistance.....	10
8.3 Tear resistance.....	11
8.4 Burst strength.....	11
8.5 Puncture resistance.....	11
9 Glove moisture barrier performance	11
9.1 Water penetration resistance.....	11
9.2 Liquid penetration resistance.....	11
9.3 Liquid penetration resistance (runoff method).....	12
9.4 Whole glove integrity.....	12
9.5 Viral penetration resistance.....	12
10 Glove ergonomic performance requirements	12
10.1 Dexterity.....	12
10.2 Dexterity.....	12
10.3 Grip.....	12
10.4 Liner inversion.....	12
10.5 Ease of donning and doffing.....	12
11 Glove test methods	13
11.1 Whole glove integrity test.....	13

11.1.3	Specimens.....	13
11.1.4	Procedure.....	13
11.1.5	Report.....	13
11.2	Grip test.....	14
11.2.1	Principle.....	14
11.2.2	Equipment.....	14
11.2.3	Specimens.....	14
11.2.4	Procedure.....	14
11.2.5	Report.....	15
11.3	Liner inversion test.....	15
11.3.1	Principle.....	15
11.3.2	Specimens.....	15
11.3.3	Procedure.....	15
11.3.4	Determination of baseline donning time.....	15
11.3.5	Determination of the final donning time.....	15
11.3.6	Report.....	16
11.4	Ease of donning and doffing test.....	16
11.4.1	Principle.....	16
11.4.2	Specimens.....	16
11.4.3	Procedure.....	16
11.4.4	Report.....	16
12	Compatibility.....	17
13	Marking.....	17
14	Manufacturer's information.....	17
	Bibliography.....	18

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 94, *Personal protection — Protective clothing and equipment*, Subcommittee SC 14, *Firefighters' personal equipment*.

This second edition cancels and replaces the first edition (ISO 11999-4:2015), which has been technically revised.

The main changes are as follows:

- technical and editorial changes have been made throughout the document.

A list of all parts in the ISO 11999 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
