Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and designations	2
5 General requirements	5
5.1 General.....	5
5.2 Fracture parameters.....	7
5.3 Fracture toughness symbols.....	8
5.4 Test specimens.....	8
5.4.1 Specimen configuration and size.....	8
5.4.2 Specimen preparation.....	12
5.5 Pre-test requirements.....	18
5.5.1 Pre-test measurements.....	18
5.5.2 Crack shape/length requirements.....	19
5.6 Test apparatus.....	19
5.6.1 Calibration.....	19
5.6.2 Force application.....	19
5.6.3 Displacement measurement.....	19
5.6.4 Test fixtures.....	20
5.7 Test requirements.....	24
5.7.1 Three-point bend testing.....	24
5.7.2 Compact tension testing.....	24
5.7.3 Specimen test temperature.....	24
5.7.4 Recording.....	25
5.7.5 Testing rates.....	25
5.7.6 Test analyses.....	25
5.8 Post-test crack measurements.....	25
5.8.1 General.....	25
5.8.2 Initial crack length, a_0	25
5.8.3 Stable crack extension, Δa	28
5.8.4 Unstable crack extension.....	28
6 Determination of fracture toughness for stable and unstable crack extension	29
6.1 General.....	29
6.2 Determination of plane strain fracture toughness, K_{Ic}	30
6.2.1 General.....	30
6.2.2 Interpretation of the test record for F_Q	30
6.2.3 Calculation of K_Q	31
6.2.4 Qualification of K_Q as K_{Ic}	32
6.3 Determination of fracture toughness in terms of δ	32
6.3.1 Determination of F_c and V_c , F_u and V_u , or F_{uc} and V_{uc}	32
6.3.2 Determination of F_m and V_m	34
6.3.3 Determination of V_p	34
6.3.4 Calculation of δ_0	34
6.3.5 Qualification of δ_0 fracture toughness value.....	35
6.4 Determination of fracture toughness in terms of J	35
6.4.1 Determination of F_c and q_c , F_u and q_u , or F_{uc} and q_{uc}	35
6.4.2 Determination of F_m and q_m	36
6.4.3 Determination of U_p	36
6.4.4 Calculation of J_0	37
6.4.5 Qualification of J_0 fracture toughness value.....	37

7	Determination of resistance curves δ_J-Δa and J-Δa and initiation toughness $\delta_{J0,2BL}$ and $J_{0,2BL}$ and δ_{ji} and J_i for stable crack extension	38
7.1	General	38
7.2	Test procedure	38
7.2.1	General	38
7.2.2	Multiple-specimen procedure	38
7.2.3	Single-specimen procedure	38
7.2.4	Final crack front straightness	38
7.3	Calculation of J and δ_J	39
7.3.1	Calculation of J	39
7.3.2	Calculation of δ_J	39
7.4	R -curve plot	40
7.4.1	Plot construction	41
7.4.2	Data spacing and curve fitting	42
7.5	Qualification of resistance curves	42
7.5.1	Qualification of J - Δa resistance curves	42
7.5.2	Qualification of δ_J - Δa resistance curves	43
7.6	Determination and qualification of $J_{0,2BL}$ and $\delta_{J0,2BL}$	44
7.6.1	Determination of $J_{0,2BL}$	44
7.6.2	Determination of $\delta_{J0,2BL}$	45
7.7	Determination of initiation toughness J_i and δ_{ji} by scanning electron microscopy (SEM)	46
8	Test report	46
8.1	Organization	46
8.2	Specimen, material and test environment	47
8.2.1	Specimen description	47
8.2.2	Specimen dimensions	47
8.2.3	Material description	47
8.2.4	Additional dimensions	47
8.2.5	Test environment	47
8.2.6	Fatigue precracking conditions	47
8.3	Test data qualification	48
8.3.1	Limitations	48
8.3.2	Crack length measurements	48
8.3.3	Fracture surface appearance	48
8.3.4	Pop-in	48
8.3.5	Resistance curves	48
8.3.6	Checklist for data qualification	48
8.4	Qualification of K_{Ic}	49
8.5	Qualification of the δ_J - R Curve	49
8.6	Qualification of the J - R Curve	50
8.7	Qualification of $\delta_{J0,2BL(B)}$ as $\delta_{J0,2BL}$	50
8.8	Qualification of $J_{0,2BL(B)}$ as $J_{0,2BL}$	50
	Annex A (informative) Determination of δ_{ji} and J_i	51
	Annex B (normative) Crack plane orientation	56
	Annex C (informative) Example test reports	57
	Annex D (normative) Stress intensity factor coefficients and compliance relationships	66
	Annex E (informative) Measurement of load-line displacement q in the three-point bend test	71
	Annex F (informative) Derivation of pop-in formulae	76
	Annex G (informative) Analytical methods for the determination of V_p and U_p	78
	Annex H (informative) Guidelines for single-specimen methods	80
	Annex I (normative) Power-law fits to crack extension data (see Reference [42])	95
	Bibliography	96

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 164, *Mechanical testing of metals*, Subcommittee SC 4, *Toughness testing — Fracture (F), Pendulum (P), Tear (T)*.

This second edition cancels and replaces the first edition (ISO 12135:2002), which has been technically revised. It also incorporates the Technical Corrigendum ISO 12135:2002/Cor 1:2008.
