First edition
2020-09

Agricultural trailers and trailed equipment — Drawbar jacks —

Part 1: Design safety, test methods and acceptance criteria

Remorques agricoles et matériel traîné — Béquilles d'attelage —

*Partie 1: Sécurité par conception, méthode d'essai et critères
d'acceptation*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Design requirements	4
4.1 Base.....	4
4.2 Jack overtravel.....	4
4.3 Hydraulic jacks.....	4
4.4 Drop leg.....	5
5 Performance requirements	5
5.1 Crank effort.....	5
5.2 Corrosion protection.....	5
5.3 Water ingress.....	5
5.4 Basic rated life.....	5
5.5 Rated static compressive load capacity.....	5
5.6 Rated dynamic compressive load capacity.....	5
5.7 Rated static tensile load capacity.....	6
5.8 Rated dynamic tensile load capacity.....	6
5.9 Rated static side load capacity.....	6
5.10 Rated static side torque class.....	6
6 Jack stand system design verification tests	7
6.1 General procedures and installation of jack.....	7
6.2 Crank effort test.....	7
6.3 Jack overtravel test.....	7
6.4 Ground pressure calculation.....	7
6.5 Corrosion protection test.....	8
6.6 Rated static compressive load capacity test.....	8
6.7 Rated dynamic compressive load capacity test.....	8
6.8 Rated static tensile load capacity test.....	9
6.9 Rated dynamic tensile load capacity test.....	9
6.10 Rated static side load capacity test.....	10
6.11 Maintenance of the load.....	10
6.12 Acceptance criteria.....	10
6.12.1 General.....	10
6.12.2 Functional failure.....	10
6.12.3 Catastrophic failure.....	10
7 Information for use	11
7.1 Instructions.....	11
7.2 Markings.....	11
7.2.1 Load capacities.....	11
7.2.2 Torque class.....	11
7.2.3 Identification.....	11
7.2.4 Other markings.....	11
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 3, *Safety and comfort*.

This first edition of ISO 12140-1, together with ISO 12140-2, cancels and replaces ISO 12140:2013, which has been technically revised.

The main changes compared to the previous edition are as follows:

- the application requirements have been moved to a separate part (i.e. ISO 12140-2);
- the term used for describing machinery types has been clarified.

A list of all parts in the ISO 12140 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
