## Contents

|  | Page      |
|--|-----------|
| <b>Foreword</b> .....  | <b>v</b>  |
| <b>1 Scope</b> .....   | <b>1</b>  |
| <b>2 Normative references</b> .....                              | <b>1</b>  |
| <b>3 Terms, definitions, abbreviations and symbols</b> .....     | <b>1</b>  |
| <b>4 Application of cathodic protection in seawater</b> .....    | <b>5</b>  |
| 4.1 General .....  | 5         |
| 4.2 Galvanic anode method .....                                  | 5         |
| 4.3 Impressed current method .....                               | 6         |
| 4.4 Hybrid systems .....   | 6         |
| <b>5 Determination of level of cathodic protection</b> .....     | <b>9</b>  |
| 5.1 Measurement of protection level .....                        | 9         |
| 5.2 Reference electrodes .....                                   | 9         |
| 5.3 Potentials of reference electrodes .....                     | 9         |
| 5.4 Verification of reference electrodes .....                   | 9         |
| 5.5 Potential measurement .....                                  | 10        |
| <b>6 Cathodic protection potential criteria</b> .....            | <b>10</b> |
| 6.1 General .....  | 10        |
| 6.2 Carbon-manganese and low alloy steels .....                  | 10        |
| 6.3 Other metallic materials .....                               | 13        |
| 6.3.1 General .....  | 13        |
| 6.3.2 Stainless steels .....                                     | 13        |
| 6.3.3 Nickel alloys .....  | 14        |
| 6.3.4 Aluminium alloys .....                                     | 14        |
| 6.3.5 Copper alloys .....  | 14        |
| <b>7 Design considerations</b> .....                             | <b>14</b> |
| 7.1 Introduction .....   | 14        |
| 7.2 Technical and operating data .....                           | 15        |
| 7.2.1 Design life .....  | 15        |
| 7.2.2 Materials of construction .....                            | 15        |
| 7.3 Surfaces to be protected .....                               | 15        |
| 7.4 Protective coatings .....                                    | 15        |
| 7.5 Availability of electrical power .....                       | 16        |
| 7.6 Weight limitations .....                                     | 16        |
| 7.7 Adjacent structures .....                                    | 16        |
| 7.8 Installation considerations .....                            | 16        |
| 7.9 Current demand .....   | 16        |
| <b>8 Effect of environmental factors on current demand</b> ..... | <b>16</b> |
| 8.1 Introduction .....   | 16        |
| 8.2 Dissolved oxygen .....                                       | 17        |
| 8.3 Sea currents .....   | 17        |
| 8.4 Calcareous deposits .....                                    | 17        |
| 8.5 Temperature .....  | 18        |
| 8.6 Salinity .....   | 18        |
| 8.7 pH .....   | 18        |
| 8.8 Marine fouling .....   | 18        |
| 8.9 Effect of depth .....  | 19        |
| 8.10 Seasonal variations and storms .....                        | 19        |
| <b>9 Secondary effects of cathodic protection</b> .....          | <b>19</b> |
| 9.1 General .....  | 19        |
| 9.2 Alkalinity .....   | 19        |
| 9.3 Environmentally-assisted cracking .....                      | 19        |

|                     |   |           |
|---------------------|---|-----------|
| 9.3.1               | General.....  | 19        |
| 9.3.2               | Hydrogen embrittlement.....   | 20        |
| 9.3.3               | Corrosion fatigue.....  | 20        |
| 9.4                 | Chlorine.....   | 21        |
| 9.5                 | Stray currents and interference effects.....  | 21        |
| <b>10</b>           | <b>Use of cathodic protection in association with coatings.....</b>   | <b>21</b> |
| 10.1                | Introduction.....   | 21        |
| 10.2                | Coating selection.....  | 22        |
| 10.3                | Coating breakdown.....  | 22        |
| <b>Annex A</b>      | <b>(informative) Corrosion of carbon-manganese and low-alloy steels.....</b>  | <b>24</b> |
| <b>Annex B</b>      | <b>(informative) Principles of cathodic protection.....</b>   | <b>28</b> |
| <b>Annex C</b>      | <b>(informative) Reference electrodes.....</b>  | <b>31</b> |
| <b>Annex D</b>      | <b>(informative) Corrosion of metallic materials other than carbon-manganese and low-alloy steels typically subject to cathodic protection in seawater.....</b> | <b>35</b> |
| <b>Bibliography</b> | .....   | <b>37</b> |

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by the European Committee for Standardization (CEN) (as EN 12473:2014) and was adopted, without modification, by Technical Committee ISO/TC 156, *Corrosion of metals and alloys*.

This second edition cancels and replaces the first edition (ISO 12473:2006), which has been technically revised.
