Contents

	Page
Foreword	iv
1 Scope	1
2 Terms and definitions	1
3 Optical radiation hazards	2
3.1 Risk assessment.....	2
3.2 Control measures.....	2
4 Eye protection	3
4.1 Protective eyewear.....	3
4.2 Filter protection factor (FPF).....	3
4.3 Luminous transmittance and colour perception.....	4
5 User comfort and secondary safety issues	4
5.1 Peripheral leakage.....	4
5.2 Secondary reflections from eyewear frame and filters.....	4
5.3 Quality of filters and clarity of vision.....	4
5.4 Exposure to bright flashes below ELVs.....	4
5.5 Overheating of eyewear.....	5
5.6 Additional considerations for auto darkening filters.....	5
Annex A (informative) Ocular exposure to optical radiation	6
Annex B (informative) Retinal thermal hazard — Assessment flowchart	7
Annex C (informative) Retinal thermal hazard — Example calculation	8
Annex D (informative) Protective eyewear for the patient/client	12
Annex E (informative) Protective eyewear for the operator	13
Annex F (informative) Filter protection factor	14
Annex G (informative) Luminous transmittance	16
Annex H (informative) Colour perception of ILS protective eyewear — Example	17
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 94, *Personal safety – Protective clothing and equipment*, Subcommittee SC 6, *Eye and face protection*.

ISO 12609 consists of the following parts, under the general title *Eyewear for protection against intense light sources used on humans and animals for cosmetic and medical applications*:

- *Part 1: Specification for products*
- *Part 2: Guidance for use*
