

Third edition
2022-08

Tissue paper and tissue products —

Part 4:

Determination of tensile strength, stretch at maximum force and tensile energy absorption

Papier tissue et produits tissue —

*Partie 4: Détermination de la résistance à la rupture par traction,
de l'allongement à la force maximale et de l'énergie absorbée à la
rupture par traction*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	2
5.1 Tensile-testing apparatus.....	2
5.1.1 General.....	2
5.1.2 Means for measuring the area of the force-elongation curve.....	3
5.1.3 Clamps.....	3
5.2 Cutting device.....	3
6 Conditioning	3
7 Preparation of test pieces	3
7.1 General.....	3
7.2 Dimensions.....	4
7.3 Number of test pieces.....	4
8 Procedure	4
9 Calculation	5
9.1 General.....	5
9.2 Tensile strength.....	5
9.3 Tensile index.....	5
9.4 Stretch at maximum force.....	5
9.5 Tensile energy absorption.....	6
9.6 Tensile energy absorption index.....	6
10 Test report	6
Annex A (informative) Precision	8
Annex B (informative) Tensile modulus determination	10
Bibliography	12

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 6, *Paper, board and pulps*, Subcommittee SC 2, *Test methods and quality specifications for paper and board*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 172, *Pulp, paper and board*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 12625-4:2016), which has been technically revised.

The main changes are as follows:

- inclusion of [Annex B](#), which describes a method of determining the tensile modulus.

A list of all parts in the ISO 12625 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
