

**ISO 12625-5**

**Tissue paper and tissue products —  
Part 5:  
Determination of wet tensile  
strength**

*Papier tissue et produits tissue —*

*Partie 5: Détermination de la résistance à la rupture par traction  
à l'état humide*

**Third edition  
2024-05**

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Principle</b> .....	<b>2</b>
<b>5 Apparatus</b> .....	<b>2</b>
5.1 Vertical tensile-strength-testing apparatus.....	2
5.1.1 Tensile-strength-testing apparatus.....	2
5.1.2 Tensile-testing apparatus clamps.....	2
5.1.3 Finch Cup soaking device.....	3
5.2 Horizontal tensile-strength-testing apparatus.....	4
5.2.1 Tensile-strength-testing apparatus.....	4
5.2.2 Tensile-testing apparatus clamps.....	4
5.2.3 Soaking device.....	5
5.3 Cutting device.....	5
<b>6 Conditioning</b> .....	<b>5</b>
<b>7 Preparation of test pieces</b> .....	<b>5</b>
7.1 General.....	5
7.2 Accelerated ageing (curing).....	5
7.3 Dimensions.....	6
7.3.1 Vertical tensile-strength-testing apparatus.....	6
7.3.2 Horizontal tensile-strength-testing apparatus.....	6
7.4 Number of test pieces.....	6
<b>8 Procedure</b> .....	<b>6</b>
8.1 Calibration and adjustment of the testing apparatus.....	6
8.2 Vertical test method.....	6
8.2.1 Mounting the Finch Cup soaking device.....	6
8.2.2 Measurement.....	7
8.3 Horizontal test method.....	7
8.3.1 Wet tensile strength measurement.....	7
8.3.2 Wet-tensile-strength retention measurement.....	8
<b>9 Calculation</b> .....	<b>9</b>
9.1 General.....	9
9.2 Wet tensile strength.....	9
9.3 Mean wet tensile strength retention.....	9
<b>10 Test report</b> .....	<b>10</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 6, *Paper, board and pulps*, Subcommittee SC 2, *Test methods and quality specifications for paper and board*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 172, *Pulp, paper and board*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 12625-5:2016), which has been technically revised.

The main changes are as follows:

- updated force measurement requirements (in [5.1.1](#) and [5.2.1](#));
- added clarification to [7.2.1](#) (“accelerated” and “rapid” have the same meaning in this document).

A list of all parts in the ISO 12625 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
