Copper, lead, zinc and nickel concentrates — Sampling procedures for determination of metal and moisture content

*Concentrés de cuivre, de plomb, de zinc et de nickel — Procédures
d'échantillonnage pour la détermination de la teneur en métal et de
l'humidité*

	Page
Foreword	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Sampling theory	4
4.1 General.....	4
4.2 Total variance.....	4
4.3 Sampling-stage method of estimating sampling and total variance.....	6
4.4 Simplified method of estimating sampling and total variance.....	9
4.5 Interleaved sample method of measuring total variance.....	10
5 Establishing a sampling scheme	12
6 Mass of increment	17
6.1 General.....	17
6.2 Mass of increment for falling-stream samplers.....	17
6.3 Mass of increment for cross-belt samplers.....	17
6.4 Mass of increment for manual sampling from stationary lots.....	17
6.4.1 Primary increments.....	17
6.4.2 Mass of secondary and subsequent increments.....	18
6.5 Mass of increment for stopped-belt reference sampling.....	18
7 Methods of sampling from concentrate streams	18
7.1 General.....	18
7.2 Mass-basis systematic sampling.....	18
7.2.1 General.....	18
7.2.2 Sampling interval.....	19
7.2.3 Sample cutter.....	19
7.2.4 Taking of primary increments.....	19
7.2.5 Constitution of subsamples and lot samples.....	19
7.2.6 Types of division.....	20
7.2.7 Division of increments.....	20
7.2.8 Division of subsamples.....	20
7.2.9 Division of lot samples.....	20
7.3 Time-basis systematic sampling.....	21
7.3.1 General.....	21
7.3.2 Sampling interval.....	21
7.3.3 Sample cutter.....	21
7.3.4 Taking of primary increments.....	22
7.3.5 Constitution of subsamples and lot samples.....	22
7.3.6 Types of division.....	22
7.3.7 Division of increments and subsamples.....	22
7.3.8 Division of lot samples.....	22
7.4 Stratified random sampling.....	22
7.4.1 Fixed mass intervals.....	22
7.4.2 Fixed time intervals.....	23
8 Mechanical sampling of concentrate streams	23
8.1 General.....	23
8.2 Design of the sampling system.....	23
8.2.1 Safety of operators.....	23
8.2.2 Location of sample cutters.....	23
8.2.3 Provision for interleaved sampling.....	23
8.2.4 Provision for stratified random sampling.....	24
8.2.5 Checking precision and bias.....	24
8.2.6 Avoiding bias.....	24

8.2.7	Minimizing bias.....	24
8.2.8	Configuration of the sampling system.....	24
8.3	Sample cutters.....	24
8.3.1	General.....	24
8.3.2	Design criteria.....	25
8.3.3	Cutter speed.....	26
8.4	Mass of increments.....	26
8.5	Number of increments.....	27
8.6	Sampling interval.....	27
8.7	Routine checking.....	27
9	Manual sampling of concentrate streams.....	28
9.1	General.....	28
9.2	Choosing the sampling location.....	28
9.3	Sampling implements.....	28
9.4	Mass of increments.....	28
9.5	Number of increments.....	28
9.6	Sampling interval.....	28
9.7	Sampling procedures.....	29
9.7.1	General.....	29
9.7.2	Full stream cut from a falling stream.....	29
9.7.3	Partial stream cuts from a falling stream.....	29
9.7.4	Sampling from moving conveyor belts.....	30
10	Stopped-belt reference sampling.....	30
11	Sampling from grabs.....	31
11.1	General.....	31
11.2	Mass of primary increments.....	31
11.3	Number of primary increments.....	31
11.4	Method of sampling.....	31
11.5	Constitution of subsamples and lot samples.....	31
12	Sampling from trucks, railway wagons and sampling hoppers.....	32
12.1	General.....	32
12.2	Mass of primary increments.....	32
12.3	Number of primary increments.....	32
12.4	Method of sampling.....	32
12.5	Constitution of subsamples and lot samples.....	32
13	Sampling of concentrate in bags or drums.....	35
13.1	General.....	35
13.2	Mass of primary increments.....	35
13.3	Number of primary increments.....	35
13.4	Method of sampling.....	36
13.4.1	General.....	36
13.4.2	Sampling during filling or emptying.....	36
13.4.3	Spear sampling.....	36
13.5	Constitution of subsamples and lot samples.....	36
14	Sampling of stockpiles.....	37
15	Methods of comminution, mixing and division.....	37
15.1	General.....	37
15.2	Comminution.....	37
15.2.1	General.....	37
15.2.2	Mills.....	37
15.3	Mixing.....	38
15.3.1	General.....	38
15.3.2	Methods of mixing.....	38
15.4	Division.....	39
15.4.1	Chemical analysis samples.....	39

15.4.2	Moisture samples	40
15.4.3	Number of increments for division	40
15.4.4	Minimum mass of divided sample	40
15.4.5	Rotary sample division	41
15.4.6	Cutter-type division	42
15.4.7	Manual increment division	42
15.4.8	Spear division	42
15.4.9	Fractional shovelling	43
15.4.10	Ribbon division	44
15.4.11	Riffle division	46
16	Sample requirements	49
16.1	Moisture samples	49
16.1.1	Mass of test portion	49
16.1.2	Processing of samples	49
16.2	Chemical analysis samples	49
16.3	Physical test samples	50
17	Packing and marking of samples	50
Annex A	(normative) Sampling stage method of estimating sampling and total variance	51
Annex B	(informative) Estimation of total variance — Barge unloading using a grab	59
Annex C	(informative) Mechanical sample cutters	63
Annex D	(informative) Checklist for mechanical sampling systems	68
Annex E	(normative) Manual sampling devices	72
Annex F	(informative) Apparatus for manual sampling of concentrates from stopped belts	74
Annex G	(informative) Sampling of stockpiles	75
Annex H	(normative) Increment division scoops for conducting manual increment division	77
Bibliography	78

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 183, *Copper, lead, zinc and nickel ores and concentrates*.

This third edition cancels and replaces the second edition (ISO 12743:2006), which has been technically revised.

The main changes to the previous edition are as follows:

- The minimum cutting aperture for cross-belt cutters in [8.3.2.3](#) i) has been reduced to 30 mm.
- A NOTE has been added to [15.4.10](#) indicating that ribbons with smaller dimensions can be formed depending on the mass of sample to be divided, and that the ribbon division method is particularly suitable for dividing chemical analysis samples.
- The requirements for preparation of chemical analysis samples in [16.2](#) have been expanded.
