## Contents

Page

Foreword .....	iv
<b>1 Scope .....</b>	<b>1</b>
<b>2 Terms and definitions .....</b>	<b>1</b>
2.1 General .....	1
2.2 Terms relating to validation criteria for analytical results .....	2
<b>3 Principle .....</b>	<b>3</b>
<b>4 General information .....</b>	<b>4</b>
4.1 Matrix effect .....	4
4.2 Decision tree .....	5
<b>5 First step — Minimum validation criteria on standard solutions .....</b>	<b>6</b>
5.1 General .....	6
5.2 Estimation of detection and quantification limit in solvent (optional).....	6
5.3 Analytical conformity .....	7
5.4 Calibration: precision, linearity and accuracy .....	7
<b>6 Second step — Sample screening.....</b>	<b>8</b>
6.1 General .....	8
6.2 Sample screening.....	8
<b>7 Third step — Assays .....</b>	<b>8</b>
7.1 General .....	8
7.2 Analytes not detected or detected at concentrations less than the LoQ .....	9
7.3 Analytes detected at a concentration greater than the LoQ .....	9
<b>8 Summary .....</b>	<b>11</b>
<b>Annex A (informative) Example of selection of a weighting factor.....</b>	<b>12</b>
<b>Annex B (normative) Assays with a target value (simplified approach).....</b>	<b>13</b>
<b>Bibliography.....</b>	<b>14</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 12787 was prepared by Technical Committee ISO/TC 217, *Cosmetics*.
