Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements	2
4.1 General	2
4.2 Physiological compatibility	3
4.3 Measurement system	4
4.4 Dimensional tolerances on nominal size	4
4.5 Tolerance on screw threads	4
4.6 Dimensional stability at elevated temperature	4
4.7 Resistance to perspiration	4
4.8 Mechanical stability	5
4.9 Resistance to ignition	6
4.10 Resistance to optical radiation	6
5 Selection of test samples	6
5.1 General	6
5.2 Testing for nickel release	6
5.3 Change in spectacle frame model	6
6 Preparation and conditioning of test samples	6
6.1 Test lenses	6
6.2 Sample conditioning and test conditions	7
7 Testing, inspection and compliance	7
7.1 Testing	7
7.2 Inspection and examination	8
7.3 Compliance	8
8 Test methods	9
8.1 General	9
8.2 Test for dimensional stability at elevated temperature	9
8.3 Test for resistance to perspiration	10
8.4 Bridge deformation and lens retention test	11
8.5 Endurance test	13
8.6 Test for resistance to ignition	14
8.7 Test for resistance to optical radiation	15
8.8 Nickel release	16
9 Marking	18
10 Additional information to be supplied by the manufacturer or other person placing the product on the market	19
11 Reference to ISO 12870	20
Annex A (informative) Recommendations for the design of spectacle frames	21
Annex B (informative) Examples of layout of test equipment	23
Annex C (informative) Examples of locations for cutting metal spectacle frames before testing for nickel release	26
Annex D (informative) European requirements and legislation on nickel release	27
Bibliography	28

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 12870 was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

This third edition cancels and replaces the second edition (ISO 12870:2004) which has been technically revised.
