Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements	2
4.1 General.....	2
4.2 Physiological compatibility.....	3
4.2.1 Construction.....	3
4.2.2 General physiological compatibility.....	3
4.2.3 Nickel release.....	3
4.2.4 Clinical evaluation.....	4
4.3 Measurement system.....	4
4.4 Dimensional tolerances on nominal size.....	4
4.5 Tolerance on screw threads.....	4
4.6 Dimensional stability at elevated temperature.....	4
4.7 Resistance to perspiration.....	4
4.8 Mechanical stability.....	5
4.8.1 Bridge deformation.....	5
4.8.2 Lens retention characteristics.....	5
4.8.3 Endurance.....	5
4.9 Resistance to ignition.....	6
4.10 Resistance to optical radiation.....	6
5 Selection of test samples	6
5.1 General.....	6
5.2 Testing for nickel release.....	6
5.3 Change in spectacle frame model.....	6
6 Preparation and conditioning of test samples	6
6.1 Test lenses.....	6
6.2 Sample conditioning and test conditions.....	7
7 Testing, inspection and compliance	7
7.1 Testing.....	7
7.2 Inspection and examination.....	8
7.3 Compliance.....	8
8 Test methods	9
8.1 General.....	9
8.2 Test for dimensional stability at elevated temperature.....	10
8.2.1 Apparatus.....	10
8.2.2 Procedure.....	10
8.3 Test for resistance to perspiration.....	10
8.3.1 Apparatus and reagents.....	10
8.3.2 Procedure.....	11
8.4 Bridge deformation and lens retention test.....	11
8.4.1 Apparatus.....	11
8.4.2 Procedure.....	12
8.5 Endurance test.....	13
8.5.1 Apparatus.....	13
8.5.2 Procedure.....	14
8.6 Test for resistance to ignition.....	15
8.6.1 Apparatus.....	15
8.6.2 Procedure.....	15
8.7 Test for resistance to optical radiation.....	15
8.7.1 Apparatus.....	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

This fourth edition cancels and replaces the third edition (ISO 12870:2012), which has been technically revised with the following change:

- 8.8 and Annex C are now covered in more specific standards (ISO/TS 24348:2014 and EN 16128:2015, respectively) and are now included as appropriate reference to this International Standard (see [4.2.3](#) and [Annex C](#)).
