Foreword	iv
1 Scope	1
2 Normative references	1
3 Principle	1
4 Apparatus	2
5 Reagents	3
6 Preparation of solutions	3
7 Standardization of the solutions	6
7.1 General.....	6
7.2 Sodium thiosulfate solution.....	6
7.3 Iodine solution.....	7
8 Procedure	8
8.1 Conditions of test.....	8
8.2 Sample preparation.....	8
8.3 Iodine number determination.....	8
9 Expression of results	9
10 Verification using standard reference blacks	10
11 Test report	10
Annex A (informative) Precision	11
Annex B (informative) CAS numbers of reagents	13
Bibliography	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

This fifth edition cancels and replaces the fourth edition (ISO 1304:2006), which has been technically revised with the following changes:

- [Clause 2](#) "Normative references" has been updated;
- the preferred method is stated in the scope and in [7.2.5](#);
- [4.1](#) (analytical balance) and [4.12](#) (desiccator) have been updated;
- the tolerance of the weighting in [6.1.5](#) has been modified to 0,01 g;
- the precision data have been moved to an informative annex.
