Sommaire

Page

Foreword.....	iv
1 Scope	1
2 Normative references	1
3 General requirements and recommendations	1
4 Sampling and sample processing methods	2
4.1 Sampling.....	2
4.1.1 General.....	2
4.1.2 Checking bias in mechanical sampling.....	3
4.1.3 Checking difference between sampling at different locations	3
4.2 Sample processing and analysis	3
5 Analysis of experimental data	3
5.1 Statistical basis.....	3
5.2 Determination of the mean difference and its standard deviation	4
5.3 Determination of the required number of data sets	4
5.4 Statistical test.....	6
Annex A (informative) Numerical examples of determining the bias of sampling	7
Bibliography	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 13292 was prepared by Technical Committee ISO/TC 183, *Copper, lead, zinc and nickel ores and concentrates*.

This second edition cancels and replaces the first edition (ISO 13292:1997), which has been technically revised.
