Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols and abbreviated terms	3
5 Essential variables and range of qualification	4
5.1 General.....	4
5.2 Brazing process.....	5
5.3 Brazer qualification.....	5
5.3.1 Product type.....	5
5.3.2 Type of joint.....	5
5.3.3 Parent material group(s).....	5
5.3.4 Filler metals and brazing filler application.....	6
5.3.5 Dimensions.....	6
5.3.6 Filler metal flow direction.....	7
5.4 Brazing operator qualification.....	7
5.4.1 Type of equipment.....	7
5.4.2 Filler metals and brazing filler application.....	7
6 Examination and testing	7
6.1 Supervision.....	7
6.2 Brazing conditions.....	8
6.3 Test piece.....	8
6.4 Assessment of work pieces.....	8
6.5 Extent of testing.....	8
6.6 Visual testing.....	8
6.7 Non-destructive testing.....	9
6.8 Destructive testing.....	9
6.9 Additional examination and testing.....	9
7 Acceptance requirements for test pieces	9
8 Re-tests	9
9 Period of validity	10
9.1 Initial qualification.....	10
9.2 Prolongation.....	10
10 Certificate	10
11 Designation	11
Annex A (informative) Quality requirements for brazing	12
Annex B (informative) Brazer qualification test certificate	13
Annex C (informative) Brazing operator qualification test certificate	15
Annex D (informative) Other non-essential variables	16
Annex E (normative) Material grouping system	17
Annex F (informative) Examples of test pieces	19
Bibliography	21

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes* Subcommittee SC 11, *Qualification requirements for welding and allied processes personnel*.

This second edition cancels and replaces the first edition (ISO 13585:2012), which has been technically revised.

The main changes compared to the previous edition are as follows:

- brazing processes, in accordance with ISO 4063:2009, covered by this document, have been moved to the scope;
- [Clause 3](#) has been updated and additional terms have been defined;
- additional symbols and abbreviated terms have been added to [Clause 4](#);
- [Clause 5](#) has been significantly revised and updated including clarifications on brazing operator qualification;
- material grouping has been moved to new [Annex E](#);
- [Clause 6](#) has been updated to refer to ISO or technically equivalent standards;
- the period of validity and prolongation of qualifications has been revised to 5 years in [Clause 9](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Official interpretations of ISO/TC 44 documents, where they exist, are available from this page: <https://committee.iso.org/sites/tc44/home/interpretation.html>.
