Third edition
2011-12-01

Petroleum, petrochemical and natural gas industries — Air-cooled heat exchangers

*Industries du pétrole, de la pétrochimie et du gaz naturel —
Échangeurs de chaleur refroidis à l'air*

Reference number

Foreword	v
Introduction.....	vi
1 Scope	1
2 Normative references.....	1
3 Terms and definitions	2
4 General	5
5 Proposals	6
6 Documentation	7
6.1 Approval information	7
6.2 Final records.....	8
7 Design.....	9
7.1 Tube bundle design.....	9
7.2 Air-side design.....	22
7.3 Structural design	33
8 Materials	38
8.1 General	38
8.2 Requirements for carbon steel in sour or wet hydrogen sulfide service	38
8.3 Headers	38
8.4 Louvres.....	38
8.5 Other components.....	39
9 Fabrication of tube bundle	39
9.1 Welding.....	39
9.2 Postweld heat treatment.....	40
9.3 Tube-to-tubesheet joints.....	40
9.4 Gasket contact surfaces.....	41
9.5 Thread lubrication	41
9.6 Alignment and tolerances	41
9.7 Assembly.....	42
10 Inspection, examination and testing	43
10.1 Quality control	43
10.2 Pressure test.....	45
10.3 Shop run-in	45
10.4 Equipment performance testing	45
10.5 Nameplates	45
11 Preparation for shipment.....	45
11.1 General	45
11.2 Surfaces and finishes	46
11.3 Identification and notification	46
12 Supplemental requirements	46
12.1 General	46
12.2 Design.....	46
12.3 Examination	47
12.4 Testing.....	48
Annex A (informative) Recommended practices	49
Annex B (informative) Checklist and data sheets	55

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 13706 was prepared by Technical Committee ISO/TC 67, *Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries*, Subcommittee SC 6, *Processing equipment and systems*.

This third edition cancels and replaces the second edition (ISO 13706:2005), which has been technically revised.

Introduction

It is necessary that users of this International Standard be aware that further or differing requirements can be needed for individual applications. This International Standard is not intended to inhibit a vendor from offering, or the purchaser from accepting, alternative equipment or engineering solutions for the individual application. This can be particularly applicable where there is innovative or developing technology. Where an alternative is offered, it is the responsibility of the vendor to identify any variations from this International Standard and provide details.
