Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification by types	4
5 Material characteristics and properties — Requirements	4
5.1 General	4
5.2 Melting temperature — Type 1 materials	4
5.3 Pouring temperature — Type 1 materials	4
5.4 Component colours — Type 2 materials	4
5.5 Detail reproduction	4
5.6 Compatibility with refractory investment (and gypsum if applicable)	5
5.7 Elastic recovery	5
5.8 Tear strength	5
5.9 Resistance to fungal growth — Type 1 materials only	5
6 Sampling	5
7 Test methods — General	5
7.1 Laboratory conditions	5
7.2 Verification of apparatus function	5
7.3 Specimen preparation and testing	5
7.4 Pass/fail determinations	6
7.5 Expression of test results	6
8 Specific specimen preparation and test procedures	6
8.1 Melting temperature test — Type 1 materials only	6
8.2 Detail reproduction test	7
8.3 Test for compatibility with refractory investment (and gypsum if applicable)	8
8.4 Elastic recovery test	9
8.5 Tear strength test	12
8.6 Fungal growth resistance test — Type 1 agar materials only	15
9 Requirements for packaging	15
10 Requirements for labelling	15
11 Instructions for use — Required information	16
Annex A (informative) Optional procedure for tear test	27

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14356 was prepared by Technical Committee ISO/TC 106, *Dentistry*, Subcommittee SC 2, *Prosthetic materials*.
