Fifth edition  
2017-07

---

---

## **Rubber hoses and hose assemblies — Wire-braid-reinforced hydraulic types for oil-based or water-based fluids — Specification**

*Tuyaux et flexibles en caoutchouc — Types hydrauliques avec  
armature de fils métalliques tressés pour fluides à base d'huile ou à  
base d'eau-- Spécifications*

Reference number  
ISO 1436:2017(E)

## Contents

	Page
<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>2</b>
<b>4 Classification</b> .....	<b>2</b>
<b>5 Materials and construction</b> .....	<b>2</b>
5.1 Hoses .....	2
5.2 Hose assemblies .....	2
<b>6 Dimensions</b> .....	<b>4</b>
6.1 Hose diameters, cover thickness and hose concentricity .....	4
6.2 Length .....	4
<b>7 Performance requirements</b> .....	<b>4</b>
7.1 General .....	4
7.2 Hydrostatic requirements .....	4
7.3 Minimum bend radius .....	5
7.4 Resistance to impulse .....	6
7.4.1 Oil-based fluid impulse test .....	6
7.4.2 Water-based fluid impulse test .....	6
7.4.3 Optional impulse test .....	6
7.5 Leakage of hose assemblies .....	6
7.6 Cold flexibility .....	7
7.7 Adhesion between components .....	7
7.8 Vacuum resistance .....	7
7.9 Fluid resistance .....	7
7.9.1 General .....	7
7.9.2 Oil resistance .....	7
7.9.3 Water resistance .....	8
7.10 Ozone resistance .....	8
7.11 Visual examination .....	8
<b>8 Marking</b> .....	<b>8</b>
8.1 Hoses .....	8
8.2 Hose assemblies .....	8
<b>Annex A (normative) Type and routine testing of production hoses</b> .....	<b>10</b>
<b>Annex B (informative) Production acceptance testing</b> .....	<b>11</b>
<b>Annex C (informative) Recommendations for lengths of supplied hoses and tolerances on length of hose assemblies</b> .....	<b>12</b>
<b>Bibliography</b> .....	<b>13</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Rubber and plastics hoses and hose assemblies*.

This fifth edition cancels and replaces the fourth edition (ISO 1436:2009), which has been technically revised. It also incorporates the Technical Corrigendum ISO 1436:2009/Cor. 1:2010.

The main changes compared to the previous edition are as follows:

- [Clause 1](#) has been updated to be more precise;
- [Clause 2](#) has been updated: ISO 4672 has been deleted and replaced by ISO 10619-2, and ISO 10619-1 has been added;
- [8.1](#) has been revised: year of publication of a standard shall be included in the marking if previous edition is used.
