

Rubber hoses and hose assemblies — Wire-braid-reinforced hydraulic types for oil-based or water-based fluids — Specification

Tuyaux et flexibles en caoutchouc — Types hydrauliques avec armature de fils métalliques tressés pour fluides à base d'huile ou à base d'eau — Spécifications

ISO 1436

**Seventh edition
2026-01**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Classification	2
5 Materials and construction	2
5.1 Hoses.....	2
5.2 Hose assemblies.....	2
6 Dimensions	2
6.1 Hose diameters and hose concentricity.....	2
6.2 Length.....	4
7 Performance requirements	4
7.1 General.....	4
7.2 Hydrostatic requirements.....	4
7.3 Minimum bend radius.....	5
7.4 Resistance to impulse.....	5
7.5 Leakage of hose assemblies.....	6
7.6 Low temperature flexibility.....	6
7.7 Adhesion between components.....	6
7.8 Vacuum resistance.....	6
7.9 Abrasion resistance.....	6
7.10 Fluid resistance.....	7
7.10.1 General.....	7
7.10.2 Oil resistance.....	7
7.10.3 Water-based fluid resistance.....	7
7.10.4 Water resistance.....	7
7.11 Ozone resistance.....	7
7.12 Visual examination.....	7
8 Frequency of testing	8
9 Marking	8
9.1 Hoses.....	8
9.2 Hose assemblies.....	8
Annex A (normative) Test frequency for type tests and routine tests	10
Annex B (informative) Recommendations for lengths of supplied hoses and tolerances on length of hose assemblies	12
Bibliography	13

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Rubber and plastics hoses and hose assemblies*.

This seventh edition cancels and replaces the sixth edition (ISO 1436:2020), which has been technically revised.

The main changes are as follows:

- revision of [Clause 8](#) to state that the manufacturer should define the frequency of type testing;
- revision of [Annex A](#);
- deletion of [Annex B](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
