# **Fine ceramics (advanced ceramics, advanced technical ceramics) - Mechanical properties of ceramic composites at high temperature - Determination of tensile properties**

*Céramiques techniques — Propriétés mécaniques des céramiques  
composites à haute température — Détermination des  
caractéristiques en traction*

<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms, definitions and symbols</b> .....	<b>1</b>
<b>4 Principle</b> .....	<b>4</b>
<b>5 Apparatus</b> .....	<b>4</b>
5.1 Test machine .....	4
5.2 Load train .....	4
5.3 Test chamber .....	4
5.4 Set-up for heating .....	5
5.5 Extensometer .....	5
5.6 Temperature measurement devices .....	5
5.7 Data recording system .....	5
5.8 Micrometers .....	6
<b>6 Test specimens</b> .....	<b>6</b>
6.1 General .....	6
6.2 Test specimens commonly used .....	6
<b>7 Test specimen preparation</b> .....	<b>10</b>
7.1 Machining and preparation .....	10
7.2 Number of tests of specimens .....	10
<b>8 Test procedures</b> .....	<b>11</b>
8.1 Test set-up: Temperature considerations .....	11
8.2 Test set-up: Other considerations .....	11
8.3 Testing technique .....	12
8.4 Test validity .....	13
<b>9 Calculation of results</b> .....	<b>13</b>
9.1 Test specimen origin .....	13
9.2 Tensile strength .....	13
9.3 Strain at maximum tensile force .....	13
9.4 Proportionality ratio or Pseudo-elastic modulus, elastic modulus .....	14
<b>10 Test report</b> .....	<b>15</b>
<b>Annex A (informative) Test specimen for use with optical extensometry</b> .....	<b>16</b>
<b>Bibliography</b> .....	<b>17</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 14574 was prepared by Technical Committee ISO/TC 206, *Fine ceramics*.
