

First edition
1999-03-15

Water quality — Evaluation of ultimate aerobic biodegradability of organic compounds in aqueous medium — Method by analysis of inorganic carbon in sealed vessels (CO₂ headspace test)

Qualité de l'eau — Évaluation en milieu aqueux de la biodégradabilité aérobie ultime des composés organiques — Méthode par analyse du carbone inorganique dans des récipients hermétiquement clos (Essai au CO₂ dans l'espace de tête)

Reference number
ISO 14593:1999(E)

Contents

1 Scope	1
2 Normative reference	1
3 Terms and definitions	2
4 Principle.....	3
5 Test environment.....	4
6 Reagents.....	4
7 Apparatus	5
8 Procedure	5
9 Calculation and expression of results.....	9
10 Expression of results	10
11 Validity of results	10
12 Precision of the method.....	11
13 Test report	11
Annex A (informative) Example of a biodegradation curve	12
Annex B (informative) Statistical treatment of results.....	13
Annex C (informative) Interlaboratory ring test.....	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 14593 was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 5, *Biological methods*.

Annexes A, B and C of this International Standard are for information only.
